英語が得意な人のための「私大難関本番レベル」— SNS 時代の友情論

2026 年 5 月 26 日

高校 3 年～既卒 (難関私大文系志望)

英語 (同志社大学 文学部・本番水準)

Trillion 塾

第1章 (例題 — 同志社大学レベル・5 分)

同志社英語は 100 分・大問 3 題で長文比重高。本問は長文 1 題で 35 分相当。

【例題】(同志社大学 文学部 入試 典型形式・改題)

Read the passage and answer the questions that follow.

Aristotle, in his *Nicomachean Ethics*, distinguished three kinds of friendship. There were friendships of utility, in which each party valued the other for what could be obtained through the relationship; friendships of pleasure, in which the value lay in the enjoyment of one another's company; and what he called friendships of virtue, in which each party valued the other for the kind of person she had become and helped the other to become. Only the third, on Aristotle's account, was friendship in the fullest sense. It required time, mutual knowledge that could not be hurried, and a willingness to wish the other's good for the other's own sake — none of which the more transactional forms of association demanded.

Twenty-three centuries later, the conditions under which contemporary people meet, communicate, and lose touch with one another are dramatically different from those Aristotle described. The technologies that mediate so much of modern friendship — messaging applications, social-media platforms, recommendation algorithms that suggest which old acquaintances we might wish to reconnect with — have no parallel in the ancient world. A young person today can maintain regular contact with hundreds of "friends" scattered across the globe, can broadcast the events of her life to all of them simultaneously, and can, with no more than a few taps, sever the connection to any of them whose presence has become unwelcome. The vocabulary of friendship has expanded; the question is whether the substance of friendship — friendship in Aristotle's third sense — has expanded with it.

Defenders of contemporary digital sociability argue that it has, in important respects, made deeper friendship more possible rather than less. The technologies in question allow friends to maintain contact through long-distance separations that would once have ended the relationship altogether; they allow shy or geographically isolated people to find communities of interest that would have been inaccessible to them; they make practical the

kind of distributed friendship that, in earlier eras, only the wealthy or the well-travelled could enjoy. Surveys of young users frequently report that their digitally mediated friendships feel deeply real to them — that the relationships built or sustained online have weight and consequence in their lives.

Critics of the same arrangements have not been silent. They point to a different body of evidence: the rising reported loneliness of populations that, by every available measure, have never been more connected; the difficulty many young adults report in moving relationships from the casual register of online interaction to the demanding intimacy that the older language of friendship described; the apparent ease with which digitally maintained friendships can be allowed to drift into the silence of inattention, since the platforms themselves keep the appearance of connection long after the substance has faded. The worry, in its sharper forms, is that the new technologies are producing a generation of people who are constantly in touch and yet not, in any deep sense, befriended.

A more careful framing avoids both polemics. The technologies are tools, like any other; what they make of friendship depends on what we make of them. They can support the slow accumulation of mutual knowledge and trust that Aristotle's third kind of friendship requires, or they can replace that accumulation with something faster, lighter, and ultimately thinner. Which of the two occurs in a given life depends on the discipline of the people who use the technologies, on the design of the platforms themselves, and on whether the surrounding culture treats deep friendship as a serious good to be cultivated or as one option among many in a marketplace of affiliations.

The deeper question, perhaps, is whether the kind of friendship Aristotle described is something that any society can afford to lose without losing something else more central than friendship itself. The capacity to know another person well and to be known by her — to have one's character shaped, over time, by sustained moral attention from someone who wishes one's good — has long been thought one of the conditions of a full human life. If contemporary technologies make that capacity easier to maintain, they have given us a gift whose value the ancient texts can help us appreciate. If they make it easier to substitute the appearance of the thing for the thing itself, they have given us a temptation whose costs the same texts can help us see.

What seems prudent is to read the older accounts not as romantic nostalgia but as a checklist: a set of questions to bring to the friendships of one's actual life. Do the

connections one maintains include any in which both parties wish the other's good for the other's own sake? Do they include any in which the mutual knowledge has grown beyond what an algorithm could provide? Where one finds such relationships, they deserve the attention and time that the older accounts insisted upon. Where one does not, the deficit cannot be made up by the number of one's contacts.

Q1. What three kinds of friendship did Aristotle distinguish, according to the first paragraph?

- ① Friendships of utility, friendships of pleasure, and friendships of virtue — with only the third counting as friendship in the fullest sense.
- ② Friendships of family, friendships of school, and friendships of work.
- ③ Friendships of childhood, of adulthood, and of old age.
- ④ Friendships of Athens, of Sparta, and of Rome.

Q2. What is the central question the second paragraph raises about contemporary digital sociability?

- ① Whether smartphones should be banned in classrooms.
- ② Whether the vocabulary of friendship has expanded with the technology, but the substance of friendship in Aristotle's third sense has expanded with it.
- ③ Whether ancient texts should still be required reading.
- ④ Whether algorithms can replace human friends entirely.

Q3. What do defenders of contemporary digital sociability argue?

- ① That all forms of in-person friendship are obsolete.
- ② That digital technologies have made deeper friendship more possible by sustaining long-distance contact, helping shy or isolated people find communities, and making distributed friendship practical for ordinary people.
- ③ That technology has eliminated all need for face-to-face communication.
- ④ That ancient philosophers were unable to imagine modern friendship.

Q4. What is the principal worry expressed by critics of digital sociability?

- ① That digital friends use up too much electricity.
- ② That the new technologies may be producing a generation of people who are constantly in touch and yet not, in any deep sense, befriended.

- ③ That young people refuse to use any social media at all.
- ④ That international communication has become too expensive.

Q5. What is the "more careful framing" that the author proposes?

- ① That the technologies are tools whose effect on friendship depends on the discipline of users, the design of platforms, and the surrounding culture's treatment of deep friendship as a serious good or merely one option among many.
- ② That all digital platforms should be permanently banned.
- ③ That Aristotle's account is now entirely obsolete.
- ④ That young people are not capable of deep friendship at all.

Q6. Which of the following best summarizes the author's overall conclusion?

- ① All contemporary friendship is superficial and should be replaced by ancient practices.
- ② The older accounts should be read not as romantic nostalgia but as a checklist of questions to bring to the friendships of one's actual life; where deep relationships exist they deserve the attention and time the ancients insisted upon, and where they do not the deficit cannot be made up by the number of one's contacts.
- ③ Aristotle has been definitively refuted by modern psychology.
- ④ Only friendships maintained in person can have any moral value.

Aristotle の 3 種の友情

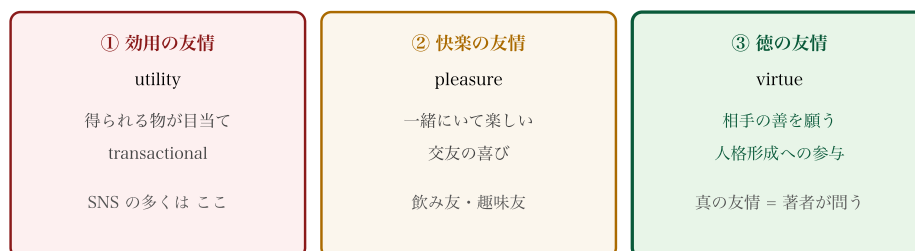

図 1-1 Aristotle の友情三分類 — 現代 SNS は ① ② を量産するが ③ は？

第2章 (解法の全体方針と武器整理・3 分)

同志社文の長文は「古典提示 → 現代の挑戦 → 楽観派 → 批判派 → 中道 → 概念的深化 → 実践提言」の 7 段論法。

【ジャンル分析】

本文は典型的な (A) moral philosophy + contemporary issues essay。著者は 7 段かけて Aristotle の友情論を現代 SNS 時代に適用する。(B) 同志社文の長文は古典哲学と現代社会の対話が頻出。

【本問で必要な 4 つの武器】

- ① (A) 古典 vs 現代の往復構造
- ② (B) utility / pleasure / virtue の三分類
- ③ (C) 倫理学用語の文脈推測 — "transactional" "sociability" "polemics" "discipline"
- ④ (D) 著者の立場 = 古典擁護派 + 中道的現実主義と読む

【各設問の戦略】

Q1 (Aristotle 3 分類) → 第 1 段

Q2 (中心的問い) → 第 2 段末 "whether the substance of friendship ... has expanded"

Q3 (楽観派) → 第 3 段 "made deeper friendship more possible"

Q4 (批判派) → 第 4 段末 "constantly in touch and yet not ... befriended"

Q5 (中道) → 第 5 段 "depends on the discipline ... design ... culture"

Q6 (実践提言) → 最終段 "checklist"

第3章 (Q1 + Q2 — Aristotle 三分類 + 中心的問い・8 分)

「古典提示 + 現代への問い」を続けて聞く。

【Q1 設問】 What three kinds of friendship did Aristotle distinguish?

★ 第 1 段の論理

"There were (A) friendships of utility ... (B) friendships of pleasure ... and what he called (C) friendships of virtue ... Only the third, on Aristotle's account, was friendship in the fullest sense."

★ Q1 paraphrase

本文 "friendships of utility ... pleasure ... virtue ... only the third ... in the fullest sense"

選択肢① "Friendships of utility, friendships of pleasure, and friendships of virtue — with only the third counting as friendship in the fullest sense"

→ 直接対応 (3 種 + 三番目が真の友情)。

【Q1 正解】 ① Friendships of utility, friendships of pleasure, and friendships of virtue — with only the third counting as friendship in the fullest sense.

【Q2 設問】 What is the central question the second paragraph raises?

★ 第 2 段末

"The vocabulary of friendship has expanded; the question is whether (A) the substance of friendship — friendship in Aristotle's third sense — has expanded with it."

★ Q2 paraphrase

本文 "vocabulary ... expanded ... substance of friendship — friendship in Aristotle's third sense — has expanded with it"

選択肢② "the vocabulary of friendship has expanded with the technology, but the substance of friendship in Aristotle's third sense has expanded with it"

→ 直接対応。

【Q2 正解】 ② Whether the vocabulary of friendship has expanded with the technology, but the substance of friendship in Aristotle's third sense has expanded with it.

💡 同志社文の典型構造: 古代哲学 → 現代問題への適用。Aristotle / Plato / Confucius / Buddha が題材になる頻度が高い。

第4章 (Q3 + Q4 — 楽観派 + 批判派・10 分)

「両側の議論」を続けて聞く。

【Q3 設問】 What do defenders of contemporary digital sociability argue?

★ 第 3 段の論理

"the technologies in question allow friends to (A) maintain contact through long-distance separations; they allow (B) shy or geographically isolated people to find communities of interest; they make practical (C) the kind of distributed friendship that, in earlier eras, only the wealthy or the well-travelled could enjoy."

★ Q3 paraphrase

本文 "maintain contact through long-distance ... shy or geographically isolated ... distributed friendship ... ordinary people"

選択肢② "digital technologies have made deeper friendship more possible by sustaining long-distance contact, helping shy or isolated people find communities, and making distributed friendship practical for ordinary people"

→ 3 要素すべて対応。

【Q3 正解】 ② That digital technologies have made deeper friendship more possible by sustaining long-distance contact, helping shy or isolated people find communities, and making distributed friendship practical for ordinary people.

【Q4 設問】 What is the principal worry expressed by critics?

★ 第 4 段末

"The worry, in its sharper forms, is that the new technologies are producing (A) a generation of people who are constantly in touch and yet not, in any deep sense, befriended."

★ Q4 paraphrase

本文 "constantly in touch and yet not ... befriended"

選択肢② "the new technologies may be producing a generation of people who are constantly in touch and yet not, in any deep sense, befriended"

→ ほぼ機械的一致。

【Q4 正解】② That the new technologies may be producing a generation of people who are constantly in touch and yet not, in any deep sense, befriended.

★ 重要観察 — Q3 と Q4 の連動

Q3 = 楽観派 (技術 = 友情拡張) → Q4 = 批判派 (常時接続 ≠ 真の友情)。 (A) Aristotle 三分類で言
えば utility/pleasure は拡張、virtue は危機という整理が可能。

第5章 (Q5 — 中道的フレーミング・5 分)

「両極批判を超える中道」を読む。

【設問】 What is the "more careful framing" that the author proposes?

★ 第 5 段の論理

"The technologies are tools, like any other; what they make of friendship depends on what we make of them."

"Which of the two occurs in a given life depends on (A) the discipline of the people who use the technologies, on (B) the design of the platforms themselves, and on (C) whether the surrounding culture treats deep friendship as a serious good to be cultivated or as one option among many in a marketplace of affiliations."

★ paraphrase 対応

本文 "depends on the discipline ... design of the platforms ... surrounding culture treats deep friendship as a serious good ... or as one option"

選択肢① "technologies are tools whose effect on friendship depends on the discipline of users, the design of platforms, and the surrounding culture's treatment of deep friendship as a serious good or merely one option among many"

→ 3 要素すべて対応。

★ 誤答分析

- ・ ② "permanently banned" → (A) 極端化。
- ・ ③ "Aristotle's account is now entirely obsolete" → 本文と (B) 正反対。
- ・ ④ "young people are not capable" → (C) 本文に世代否定なし。

【正解】 ① That the technologies are tools whose effect on friendship depends on the discipline of users, the design of platforms, and the surrounding culture's treatment of deep friendship as a serious good or merely one option among many.

友情の結果を決める 3 要因

→ 技術自体ではなく、3 要因の相互作用で friendship の質が決まる

図 5-1 中道的フレーミング — 3 要因 (個人/企業/文化) で結果が決まる

第6章 (Q6 — Main Idea 設問 + 関連話題・10 分)

倫理学エッセイの結論は「実践的 checklist」型。

【設問】 Which of the following best summarizes the author's overall conclusion?

★ 最終段の精読

"What seems prudent is to read the older accounts not as romantic nostalgia but as (A) a checklist: a set of questions to bring to the friendships of one's actual life."

具体的問い:

- "Do the connections one maintains include any in which both parties wish the other's good for the other's own sake?"
- "Do they include any in which the mutual knowledge has grown beyond what an algorithm could provide?"

結論: "Where one finds such relationships, they deserve the attention and time that the older accounts insisted upon. (B) Where one does not, the deficit cannot be made up by the number of one's contacts."

★ paraphrase 対応

本文 "checklist ... questions to bring to the friendships of one's actual life ... deserve the attention and time ... the deficit cannot be made up by the number of one's contacts"

選択肢② "the older accounts should be read not as romantic nostalgia but as a checklist of questions to bring to the friendships of one's actual life; where deep relationships exist they deserve the attention and time the ancients insisted upon, and where they do not the deficit cannot be made up by the number of one's contacts"

→ 直接対応。

【正解】 ② The older accounts should be read not as romantic nostalgia but as a checklist of questions to bring to the friendships of one's actual life; where deep relationships exist they deserve the attention and time the ancients insisted upon, and where they do not the deficit cannot be made up by the number of one's contacts.

★ 関連話題 — 同志社文進学後への接続

- (A) Aristotle "Nicomachean Ethics" Book VIII-IX — 友情論の古典

- ・ (B) Alasdair MacIntyre "After Virtue" (1981) — 美德倫理学の現代復興
- ・ (C) Sherry Turkle "Reclaiming Conversation" (2015) — デジタル時代の対話論
- ・ (D) C.S. Lewis "The Four Loves" (1960) — Aristotle 系の現代解釈
- ・ (A) Confucius "Analects" 君子の交わり — 東洋の友情論

★ 大学進学後への接続

1 年次: 哲学概論・倫理学・古典文学

2-3 年次: 倫理学ゼミ / 古典哲学ゼミ / 文化研究ゼミ

卒論候補: SNS 時代の Aristotle 友情論 / 現代日本の人間関係の倫理学 / 友情と恋愛の境界

第7章 (同志社文英語 攻略のコツ・5 分)

同志社文長文を完答するための 5 つの技術。

【コツ 1】 7 段論法 (古典 → 現代の挑戦 → 楽観 → 批判 → 中道 → 概念的深化 → 実践提言) を予測

【コツ 2】 古典哲学者の固有名詞

- ・ (A) Plato / Aristotle / Confucius / Buddha — 古代の道德哲学者
- ・ (B) Augustine / Aquinas / Kant / Mill — 中世～近代倫理学
- ・ (C) MacIntyre / Nussbaum / Taylor / Williams — 現代の美德倫理学
- ・ (D) Sherry Turkle / Jonathan Haidt — デジタル時代の倫理

【コツ 3】 同志社文頻出語の文脈推測

utility / pleasure / virtue / transactional / sociability / polemics / discipline / cultivate / affiliation / nostalgia

【コツ 4】 誤答パターン 4 種 (同志社文版)

- ・ (A) 極端化: definitively refuted / entirely obsolete / permanently banned / only friendships in person
- ・ (B) 世代否定: young people are not capable / generation is morally inferior
- ・ (C) 論点ずれ: 電気代・国際通信費・スマホ建築
- ・ (D) 逆方向: 著者の checklist 結論を「nostalgia」と解釈

【コツ 5】 時間配分 (同志社 100 分・長文比重高)

長文には(A) 35 分を割く。

【最後にひとこと】

同志社文の英語は(A) 語学試験であると同時に(B) 倫理学・古典文学リテラシー試験。本問の Aristotle 友情論は、入学後に学ぶ倫理学・思想史の核心テーマ。

第8章 (類題チャレンジ・10 分) [10 点]

本講義の手法を応用する 5 問。

(類題 1) 本文中の "transactional" の意味として最も近いものを選びなさい。

- ① 取引的・損得勘定に基づく
- ② 無償の・贈与的な
- ③ 永続的・伝統的
- ④ 宗教的・聖なる

(類題 2) 本文の "wish the other's good for the other's own sake" が示唆する友情として最も適切なものを選びなさい。

- ① Aristotle の友情の virtue (徳の友情) の中核条件
- ② ビジネス上の関係
- ③ 幼少期の遊び友達
- ④ オンラインゲームの仲間

(類題 3) 本文中で「constantly in touch and yet not befriended」が示唆する現代状況として最も適切なものを選びなさい。

- ① SNS で常時接続しているが Aristotle 第三の意味での友情は欠如している状態
- ② 通信網が物理的に断絶している状態
- ③ 外国語ができず友人が作れない状態
- ④ 高齢化で友人を失った状態

(類題 4) 本文の "marketplace of affiliations" が示唆するものとして最も適切なものを選びなさい。

- ① 友情を含む人間関係が市場の商品のように交換可能なものとして扱われる文化
- ② 国際結婚仲介サービス
- ③ 宗教団体の競争

④ 労働市場の流動性

(類題 5) 本文の論理構成として最も近いものを選びなさい。

① Aristotle 三分類 → 現代技術の登場 → 楽観派の論証 → 批判派の論証 → 中道的フレーミング (3 要因) → 概念的深化 → 実践的 checklist

② 結論先出し → 根拠列挙のみ

③ 賛成意見の単純な列挙

④ 歴史的説明のみで結論なし

第9章 (まとめ・宿題・5 分)

今日の核心整理と同志社文本番に向けた宿題

【本日の核心 5 か条】

- ① 倫理学エッセイは (A) 古典 → 現代適用 → 中道 → 実践提言 の構成。
- ② Aristotle の (B) utility / pleasure / virtue 三分類は同志社文頻出。
- ③ NOT 設問は「(C) 極端な行動指針」(banned / obsolete) が罣。
- ④ 修辞設問は「(D) 概念 → 現代適用」の橋を聞く。
- ⑤ 主旨設問は(A) 「checklist 型実践提言」を選ぶ。

【宿題】

- ① 本講義の Q1-Q6 を見ないで本文だけ読み直し、自分で 6 問の設問を作成。
- ② 類題 5 問を解き直し、本文 7 段の各段にひと言タイトルを書き出す。
- ③ 過去問: 同志社大学 文学部 英語 (過去 5 年分) から長文 1 題を選び、本日の手法で精読する。

【最後にひとこと】

同志社文の英語は(A) 語学試験であると同時に(B) 倫理学リテラシー試験。本問の Aristotle 友情論は、入学後に学ぶ古典哲学・現代倫理学の核心テーマ。
