英語が得意な人のための「私大難関本番レベル」— 隠れたカリキュラムを読み解く

2026 年 5 月 26 日

高校 3 年～既卒 (難関私大文系志望)

英語 (早稲田 教育学部・本番水準)

Trillion 塾

第1章 (例題 — 早稲田大学 教育学部レベル・5 分)

本番では 90 分で大問 4 題。本問は長文読解 1 題で 30 分相当 (教育学部の最大配点ブロック)。

【例題】(早稲田大学 教育学部 入試 典型形式・改題)

Read the passage and answer the questions that follow.

Most people, asked what schools are for, will offer some version of the obvious answer: schools teach children to read, to compute, and to absorb the information they will need as adults. The official curriculum — the list of subjects, the textbooks, the examinations — describes this explicit project in considerable detail. For more than half a century, however, sociologists of education have argued that this account is, at best, half the story. Alongside the visible curriculum, every school teaches a second, less acknowledged set of lessons: when to speak and when to remain silent, whose questions deserve serious answers, how to wait one's turn, how to perform competence for those in authority. This shadow lesson plan, transmitted not through any single subject but through the daily texture of school life, has come to be called the (A) hidden curriculum.

The phrase was coined in the late 1960s, but the underlying observation is older. The American philosopher John Dewey had already noted, in 1916, that what children learn from the manner of their schooling often matters more than what they learn from its content. By mid-century, sociologists such as Pierre Bourdieu in France and Samuel Bowles and Herbert Gintis in the United States were arguing that this second curriculum was, in important respects, the school's most consequential output. Children, they suggested, were absorbing not only facts but also dispositions — habits of deference, expectations about reward, beliefs about whose voice carries weight — that would shape their adult lives long after the periodic table had been forgotten.

The most uncomfortable implication of this research concerned inequality. If schools were teaching dispositions as well as facts, then they were also, however unintentionally, sorting children into futures congruent with their origins. A working-class child, accustomed at home to a certain manner of speech and a certain tolerance for ambiguity, might find school's implicit demands subtly foreign, while a middle-class child, raised on the same cadences and expectations that the school took for granted, would feel that the institution

was, in some sense, made for her. The official curriculum could be identical, and the examinations strictly impartial; yet the underlying advantage, distributed through countless small cues, was already in place.

To say this is not to accuse particular teachers of bad faith. The hidden curriculum is, by its nature, transmitted largely without intention. A teacher who calls more frequently on the children who raise their hands confidently is not, in any deliberate sense, discriminating against the quieter ones; she is responding to the texture of the room in the way that any reasonable adult might. But because that texture is itself shaped by what children bring from outside the school, the school ends up amplifying, rather than correcting, the differences that walked through its door.

Some recent reforms have tried to bring the hidden curriculum into the open. Schools that explicitly teach "self-advocacy," that train teachers to notice whom they call upon, or that experiment with classroom norms designed for unfamiliar rather than familiar children, have begun to ask whether the implicit lessons can be made the subject of deliberate design rather than passive transmission. None of these interventions abolishes the hidden curriculum; the very idea of doing so is probably incoherent, since a school without implicit lessons would have no daily life. What such reforms can do, more modestly, is shift which lessons get implicitly taught.

The deeper lesson, perhaps, is that no school is ever merely a place where things are learned. Every school is also a place where things happen — where some children come to feel at ease and others to feel like guests, where some forms of intelligence are recognized as such and others go unread. To ask what a school is for is therefore to ask not only what its curriculum contains but also what its corridors and classrooms quietly insist upon. The first question can be answered in a brochure; the second can only be answered by careful, often unwelcome, observation.

Q1. According to the first paragraph, what does the "hidden curriculum" refer to?

- ① The official list of subjects and textbooks used by a school.
- ② The implicit lessons — about authority, silence, and recognition — transmitted through the daily texture of school life.

- ③ A secret syllabus prepared by government inspectors.
- ④ The set of optional after-school activities offered to students.

Q2. Which of the following thinkers is NOT cited in the second paragraph as a contributor to the analysis of the hidden curriculum?

- ① John Dewey.
- ② Pierre Bourdieu.
- ③ Samuel Bowles and Herbert Gintis.
- ④ Friedrich Nietzsche.

Q3. What concern does the third paragraph raise about the hidden curriculum?

- ① It demands too much factual knowledge from working-class students.
- ② It causes the official examinations to become biased in their content.
- ③ It allows schools, even with identical official curricula, to amplify the advantages that children bring from home.
- ④ It forces middle-class children into futures unsuited to their abilities.

Q4. Why does the author insist that the hidden curriculum is not a matter of bad faith on the part of teachers?

- ① Because teachers are legally required to call on every child equally.
- ② Because the implicit lessons are transmitted largely without intention, as teachers respond reasonably to the room before them.
- ③ Because most teachers belong to the working class themselves.
- ④ Because the hidden curriculum has no measurable effect on outcomes.

Q5. Why does the author mention reforms such as teaching "self-advocacy" and training teachers to notice whom they call upon?

- ① To argue that the hidden curriculum can be entirely abolished through correct policy.
- ② As examples of attempts to bring the hidden curriculum into deliberate design rather than passive transmission.
- ③ To suggest that such reforms have been universally successful.
- ④ To recommend the abolition of public schooling.

Q6. Which of the following best summarizes the author's overall conclusion?

- ① Schools should be evaluated only by the success of their official curriculum.
- ② No school is merely a place where things are learned; every school also shapes who feels

at ease and whose intelligence is recognized, and this requires careful observation rather than reliance on brochures.

③ The hidden curriculum has been completely eliminated in modern reformed schools.

④ Schools should focus exclusively on standardized testing.

学校が教える 2 つのカリキュラム — official と hidden

図 1-1 official と hidden の二重カリキュラム — 後者が階層再生産の主要メカニズムと著者は主張

第2章 (解法の全体方針と武器整理・3 分)

教育学部の長文は「通念 → 学問的修正 → 含意の追究 → 政策的提言」の 4 段論法。

【ジャンル分析】

本文は典型的な (A) sociology-of-education essay (教育社会学エッセイ)。著者は 6 段かけて「学校は何を教えるか」を通念から学問的視座へと深め、最終的に「観察の困難さ」という謙抑的結論を提示する。(B) 教育学部の長文は「通念提示 → 学者の修正 → 不平等の含意 → 改革の限界」の 4 段論法が典型。

【本問で必要な 4 つの武器】

- ① (A) 通念 → 学問的修正 の論理流れを追う (第 1-2 段)
- ② (B) 固有名詞 = 思想家の連鎖 を捕捉 (Dewey → Bourdieu → Bowles & Gintis)
- ③ (C) 教育社会学用語の文脈推測 — "dispositions" "deference" "incongruent" "amplify"
- ④ (D) 著者の立場 = 中立的観察者 + 控えめな改革論者と読む

【各設問の戦略 — 段との対応】

- Q1 (定義) → 第 1 段末 "shadow lesson plan ... hidden curriculum" を抽出
- Q2 (NOT 設問) → 第 2 段の思想家リストに含まれない選択肢を消去法で
- Q3 (不平等の含意) → 第 3 段 "amplifying ... differences that walked through its door"
- Q4 (バッドフェイス否定) → 第 4 段 "transmitted largely without intention"
- Q5 (修辞設問・改革) → 第 5 段 "deliberate design rather than passive transmission"
- Q6 (全体結論) → 最終段 "no school is ever merely a place where things are learned"

第3章 (Q1 — Hidden Curriculum 定義設問・3 分)

教育学部 Q1 は「核心概念の定義」を聞く。第 1 段末で即決。

【設問】 What does the "hidden curriculum" refer to?

★ Step 1: 第 1 段末を精読

"Alongside the visible curriculum, every school teaches a second, less acknowledged set of lessons: (A) when to speak and when to remain silent, whose questions deserve serious answers, how to wait one's turn, how to perform competence for those in authority. This shadow lesson plan, transmitted not through any single subject but through (B) the daily texture of school life, has come to be called the hidden curriculum."

★ Step 2: 核心要素を抽出

- ・「話す/黙る」「誰の質問が真剣に扱われるか」「順番を待つ」「権威者向けの能力演出」
- ・「個別教科ではなく日常的テクスチャ」を通じて伝達

★ Step 3: paraphrase 対応

本文 "less acknowledged set of lessons ... daily texture of school life"

選択肢② "implicit lessons — about authority, silence, and recognition — transmitted through the daily texture of school life"

→ "less acknowledged" → "implicit"、"daily texture" 直接一致。

★ Step 4: 誤答分析

- ・① "official list of subjects" → (A) 本文と逆方向。official curriculum は第 1 段冒頭。
- ・③ "secret syllabus prepared by government inspectors" → (B) 極端化。"secret" は陰謀論的で本文と異なる。
- ・④ "optional after-school activities" → (C) 論点ずれ。課外活動は本文に言及なし。

【正解】 ② The implicit lessons — about authority, silence, and recognition — transmitted through the daily texture of school life.

第4章 (Q2 — NOT 設問・思想家リスト・5 分)

教育学部頻出 NOT 設問。固有名詞リストの照合で機械的に解く。

【設問】 Which of the following thinkers is NOT cited as a contributor to the analysis of the hidden curriculum?

★ Step 1: 第 2 段の思想家を列挙

"The American philosopher (A) John Dewey had already noted, in 1916 ..."

"By mid-century, sociologists such as (B) Pierre Bourdieu in France and (C) Samuel Bowles and Herbert Gintis in the United States ..."

→ 言及されている: Dewey / Bourdieu / Bowles / Gintis

★ Step 2: 選択肢と照合

- ・ ① John Dewey 下線A : ○
- ・ ② Pierre Bourdieu 下線A : ○
- ・ ③ Bowles and Gintis 下線A : ○
- ・ ④ Friedrich Nietzsche 下線B : × — 本文に登場せず

★ Step 3: 誤答 Nietzsche について

Nietzsche は 19 世紀末の哲学者で、教育社会学とは別系統。著者は教育社会学の系譜 (Dewey → Bourdieu → Bowles & Gintis) を引用しているので Nietzsche は無関係。

【正解】 ④ Friedrich Nietzsche.

💡 NOT 設問の鉄則: 4 選択肢のうち 3 つを本文と照合し ○ を付け、最後に残った × が正解。教育学エッセイは思想家系譜が頻出。

第5章 (Q3 + Q4 — 不平等の含意 + バッドフェイス否定・10 分)

教育社会学の核心「不平等の再生産」と「無意識の媒介」を2問続けて聞く。

【Q3 設問】 What concern does the third paragraph raise about the hidden curriculum?

★ 該当段 (第3段) の構造

第3段は(A) 不平等の含意を提示する段落:

"If schools were teaching dispositions as well as facts, then they were also, however unintentionally, (A) sorting children into futures congruent with their origins."

具体例:

- ・ working-class child = 学校の暗黙の要求を "subtly foreign" と感じる
- ・ middle-class child = 学校が "made for her" と感じる

段末: "The official curriculum could be identical, and the examinations strictly impartial; yet (A) the underlying advantage, distributed through countless small cues, was already in place."

→ 公式カリキュラムが同一でも、家庭背景の優位は無数の小さな手がかりを通じて既に存在する。

★ Q3 の paraphrase 対応

本文 "amplifying ... the differences that walked through its door" (第4段末)

選択肢③ "amplify the advantages that children bring from home"

→ "amplifying" 直接一致、"differences that walked through its door" → "advantages ... from home".

【Q3 正解】 ③ It allows schools, even with identical official curricula, to amplify the advantages that children bring from home.

★ Q3 誤答の罠

- ・ ① "too much factual knowledge from working-class students" → (A) 論点ずれ。factual knowledge の量の問題ではない。
- ・ ② "examinations to become biased in their content" → 本文と (B) 逆方向。"examinations strictly impartial" と明示。

・④ "middle-class children into futures unsuited to their abilities" → 本文と (C) 逆。middle-class は有利。

【Q4 設問】 Why does the author insist that the hidden curriculum is not a matter of bad faith on the part of teachers?

★ 該当段 (第 4 段) の構造

第 4 段冒頭: "To say this is not to accuse particular teachers of bad faith. The hidden curriculum is, by its nature, (A) transmitted largely without intention."

具体例: "A teacher who calls more frequently on the children who raise their hands confidently is not, in any deliberate sense, discriminating against the quieter ones; she is (B) responding to the texture of the room in the way that any reasonable adult might."

★ Q4 の paraphrase 対応

本文 "transmitted largely without intention ... responding to the texture of the room ... reasonable adult"

選択肢② "transmitted largely without intention, as teachers respond reasonably to the room before them"

→ "without intention" 直接一致、"responding reasonably" → "respond reasonably" と完全対応。

【Q4 正解】 ② Because the implicit lessons are transmitted largely without intention, as teachers respond reasonably to the room before them.

★ 重要観察 — Q3 と Q4 の連動

Q3 = 「不平等再生産」を提示 → Q4 = 「個別教師は悪くない」と擁護。 (A) 構造的問題と個別意図の切り離しは教育社会学の中核論点。「制度は不平等を再生産するが、教師個人は悪意がない」というのが Bourdieu 系統の標準的視座。

構造的不平等 vs 個別意図 — 教育社会学の二重視点

図 5-1 構造的問題と個別意図の切り離し — Bourdieu 系教育社会学の標準的フレーム

第6章 (Q5 — 改革例示の目的設問・5 分)

「修辞設問 + 改革紹介段」の組み合わせ。第 5 段の主張と例示の対応を見抜く。

【設問】 Why does the author mention reforms such as teaching "self-advocacy" and training teachers to notice whom they call upon?

★ Step 1: 第 5 段の構造

第 5 段: "Some recent reforms have tried to (A) bring the hidden curriculum into the open."

→ 主張 = 「hidden curriculum を表に出す改革」が試みられている。

例示: "self-advocacy" 教授、教師の指名パターン訓練、不慣れな子向けの教室規範実験

段末: "What such reforms can do, more modestly, is shift (A) which lessons get implicitly taught."

→ 改革は hidden curriculum を完全に消すのではなく、(B) 暗黙の伝達を意図的設計にする試み。

★ Step 2: paraphrase 対応

本文 "bring the hidden curriculum into the open ... deliberate design rather than passive transmission" (推定)

実際の本文表現: "ask whether the implicit lessons can be made the subject of deliberate design rather than passive transmission"

選択肢② "attempts to bring the hidden curriculum into deliberate design rather than passive transmission"

→ "deliberate design rather than passive transmission" がほぼ直接一致。

★ Step 3: 誤答分析

・ ① "entirely abolished" → 本文と (A) 逆方向。"None of these interventions abolishes the hidden curriculum" と明示。

・ ③ "universally successful" → (B) 本文に成功評価なし。著者は控えめな評価のみ。

・ ④ "abolition of public schooling" → (C) 論点ずれ。学校制度自体の廃止は本文と無関係。

【正解】 ② As examples of attempts to bring the hidden curriculum into deliberate design rather than passive transmission.

第7章 (Q6 — Main Idea 設問 + 関連話題・10 分)

教育エッセイの結論は「観察の必要性」を強調する謙抑的結語。

【設問】 Which of the following best summarizes the author's overall conclusion?

★ Step 1: 最終段を精読

"no school is ever merely a place where things are learned. Every school is also a place where things happen — (A) where some children come to feel at ease and others to feel like guests, where some forms of intelligence are recognized as such and others go unread."

"To ask what a school is for is therefore to ask not only what its curriculum contains but also what (B) its corridors and classrooms quietly insist upon. The first question can be answered in a brochure; (C) the second can only be answered by careful, often unwelcome, observation."

→ 主旨 3 要素: ①学校は単なる学習場ではない ②誰が ease を感じ誰が guest を感じるかを形成する ③careful observation が必要

★ Step 2: 選択肢②との対応

"No school is merely a place where things are learned; every school also shapes who feels at ease and whose intelligence is recognized, and this requires careful observation rather than reliance on brochures."

→ 3 要素すべて含む。

【Q6 正解】 ② No school is merely a place where things are learned; every school also shapes who feels at ease and whose intelligence is recognized, and this requires careful observation rather than reliance on brochures.

★ 関連話題 — 教育学部進学後への接続

本文は教育社会学の古典的議論を凝縮:

- (A) Pierre Bourdieu "La Reproduction" (1970) — cultural capital と habitus の理論
- (B) Bowles & Gintis "Schooling in Capitalist America" (1976) — correspondence principle
- (C) John Dewey "Democracy and Education" (1916) — 民主主義教育論の古典
- (D) Annette Lareau "Unequal Childhoods" (2003) — concerted cultivation 概念
- (A) 荻谷剛彦 『階層化日本と教育危機』 — 日本における階層再生産の実証研究

★ 大学進学後への接続

1 年次: 教育原理・教育心理学・教育社会学概論

2-3 年次: 教育社会学ゼミ / カリキュラム研究 / 教育政策論

卒論候補: 日本の学習指導要領と隠れたカリキュラム / 部活動と階層再生産 / 学校選択制と社会的
不平等

第8章 (教育学部英語 攻略のコツ・5 分)

教育学部長文を完答するための 5 つの技術。

【コツ 1】 4 段論法 (通念 → 学者の修正 → 含意 → 改革の限界) を予測する

第 1 段で通念 (本問は「学校は読み書き計算を教える」) を読んだら、(A) 「学者がこれを修正するはず → 不平等の含意が出るはず → 改革の限界が示されるはず」と予測。

【コツ 2】 教育学者の系譜を覚える

- ・ (A) John Dewey (1859-1952) — 米国・民主主義教育論の祖
- ・ (B) Pierre Bourdieu (1930-2002) — 仏・cultural capital / habitus 理論
- ・ (C) Bowles & Gintis — 米・correspondence principle (学校 ≡ 工場の鏡像)
- ・ (D) Paulo Freire (1921-1997) — ブラジル・批判的教育学 (banking model 批判)
- ・ (A) Howard Gardner — 米・multiple intelligences 理論

→ これら 5 人は受験英語の固有名詞として頻出。著者がどの系譜に属するかが分かると論旨予測が容易。

【コツ 3】 教育社会学用語の文脈推測 (頻出 10 語)

curriculum / disposition / deference / incongruent / hierarchy / sorting / reproduction / cultural capital / habitus / pedagogy

【コツ 4】 誤答パターン 4 種 (教育版)

- ・ (A) 言い過ぎ: completely abolished / universally successful — 教育エッセイは謙抑的結論
- ・ (B) 陰謀論: secret / conspiracy / deliberate discrimination — 教育社会学は「構造的・無意識的」を強調
- ・ (C) 論点ずれ: 校舎建築・教員給与・授業料 — 本文の関心と無関係
- ・ (D) 逆方向: 著者の主張と反対

【コツ 5】 時間配分 (教育学部 90 分)

大問 I (語彙文法): 15 分 / II (短文): 15 分 / III (本問長文): (A) 30 分 / IV (英作): 25 分 / 見直し: 5 分

【最後にひとこと】

教育学部の英語は(A) 語学試験であると同時に(B) 社会科学リテラシー試験。「official vs hidden」

「individual vs structural」「intention vs effect」の対立軸を頭に入れて読む。

第9章 (類題チャレンジ・10 分) [10 点]

本講義の手法を応用する 5 問。

(類題 1) 本文中の "dispositions" の意味として最も近いものを選びなさい。

- ① 意図的に習得された技能
- ② 傾向・習性・身に染みた態度
- ③ 教科の試験範囲
- ④ 校内の備品配置

(類題 2) 本文の "the differences that walked through its door" が示唆するものとして最も適切なものを選びなさい。

- ① 校門での出席確認システム
- ② 子供たちが学校に持ち込む家庭背景の差
- ③ 学校建築の物理的特徴
- ④ 教科書配布の遅延

(類題 3) 本文中で Bourdieu が引用される目的として最も適切なものを選びなさい。

- ① 20 世紀後半の教育社会学の代表的論者として
- ② 本文の著者の指導教官として
- ③ 公式カリキュラムの設計者として
- ④ フランスの教育制度の創立者として

(類題 4) 本文の "made for her" という表現が含意するものとして最も適切なものを選びなさい。

- ① 学校が中流階級の子供の感覚と暗黙に調和している状態
- ② 個別最適化された学習プログラム
- ③ 女子教育の理想像
- ④ 建築設計上の配慮

(類題 5) 本文の論理構成として最も近いものを選びなさい。

- ① 通念 → 学問的修正 → 不平等の含意 → 個別意図の擁護 → 改革の限界 → 観察の必要性
- ② 結論先出し → 根拠列挙のみ
- ③ 起承転結の 4 部構成
- ④ 賛成意見の単純な列挙

第10章 (まとめ・宿題・5 分)

今日の核心整理と早稲田教育学部本番に向けた宿題

【本日の核心 5 か条】

- ① 教育エッセイは (A) 「通念 → 修正 → 含意 → 改革の限界」 の 4 段論法が 8 割。
- ② Dewey / Bourdieu / Bowles & Gintis / Freire の (B) 思想家系譜 を頭に入れておく。
- ③ "dispositions" "habitus" "cultural capital" 等の (C) 教育社会学用語 を文脈推測で。
- ④ (D) 構造的問題 vs 個別意図 の切り離しが Bourdieu 系の核心。本問 Q3-Q4 はこの典型配置。
- ⑤ 主旨設問は (A) 謙抑的結論 を選ぶ。「universally / completely abolished」は罣。

【宿題】

- ① 本講義の Q1-Q6 を見ないで本文だけ読み直し、自分で 6 問の設問を作成 → 自分で解いてみる。
- ② 類題 5 問を解き直し、本文 6 段の各段にひと言タイトルを書き出す。
- ③ 過去問: 早稲田大学 教育学部 英語 (過去 5 年分) から長文 1 題を選び、本日の手法で精読する。

【次回授業】 教育学部の英作文 (200 words 程度) — "Should standardized testing be abolished in Japan?" の論理構成

【最後にひとこと】

教育学部の英語は (A) 語学試験 であると同時に (B) 教育思想史リテラシー試験。本文の hidden curriculum を「自分が大学で 4 年間学ぶ教育社会学の予告編」として読んでください。
