第1章 (例題 — 立教 異文化コミュニケーションレベル・5 分)

立教異コミは 75 分・大問 3-4 題。本問は長文 1 題で 25 分相当。

【例題】(立教大学 異文化コミュニケーション学部 入試 典型形式・改題)

Read the passage and answer the questions that follow.

For most of the twentieth century, the cities and regions that received international tourists tended to regard them as an unalloyed asset. Tourists brought hard currency, supported local employment, and confirmed the host community's importance by the simple fact of having travelled to see it. The development of cheap air travel, the rise of online booking platforms, and the spread of social media that turned obscure beauty spots into universally recognized destinations multiplied tourist numbers far beyond what any earlier generation had imagined possible. The town councils of historic European cities, the rangers of national parks, and the ministries of tourism of small island states all welcomed the rising tide.

Somewhere around the middle of the second decade of this century, a new vocabulary began to enter serious public discussion. The word "overtourism," coined to describe the condition in which visitor numbers had begun to damage the very places and communities that attracted them, appeared first in industry trade journals and then in mainstream newspapers. Residents of Venice, of Barcelona, of Dubrovnik, of Kyoto's Gion district, began to express, in increasingly organized form, complaints that would once have been considered ungrateful: that they could no longer cross their own city centres without being elbowed off the pavement, that their grocery shops had been replaced by souvenir stands, that their rents had risen as apartments were converted to short-term rentals, that the textures of daily life that had made these places interesting in the first place were being quietly erased by the very people who had come to admire them.

The phenomenon presents an unusually pure example of what economists call a tragedy of the commons. Each individual tourist, considering only her own decision, has every reason to want to see the famously beautiful place; the marginal damage that her one visit will cause is too small to weigh seriously against the value of seeing the place at all. The same is true of every other tourist. The aggregate effect, however, is the cumulative

degradation of precisely the experience that any single tourist had hoped to have. The most photographed views of Venice now include, in the foreground, the heads of other photographers; the temples of Kyoto absorb visitor flows for which their gardens were never designed; the small streets of Dubrovnik, used as a setting for a popular television series, are crowded with visitors many of whom have come not to see the city but to recognize the locations of fictional events.

Several lines of response have begun to emerge. The simplest is the imposition of caps: limits on the number of visitors who may enter a particular site or city on a given day. Caps have the advantage of being directly responsive to the problem they address, but they raise difficult questions about who gets to enter, on what basis, and at what price. Auctioning the limited slots favours the affluent; lotteries deal even-handedly with citizens of vastly unequal means; complex rationing systems risk being administered with the kind of capriciousness that erodes their legitimacy. The political authorities asked to choose among these options have not, in general, distinguished themselves by the clarity of their reasoning.

A second response has been to redistribute tourism in space and time, encouraging visitors to come during less popular seasons or to visit secondary sites instead of the famous ones. The advantage of this approach is that it preserves the value of tourism to the local economy while spreading the pressure more evenly. The disadvantage is that it works only when visitors can be persuaded; the very characteristics that make a destination famous in the first place — the postcard view, the universally recognized image — are not easily reproduced elsewhere. To recommend that tourists visit lesser-known cities while they continue to crowd the most famous ones is to recommend something that, in practice, only the more thoughtful fraction of visitors will accept.

A third and more radical response begins to question what the goal of tourism policy ought to be. If tourism is understood primarily as a source of revenue, then any solution that reduces tourist numbers, however justified by local quality of life, is a loss to be minimized. If tourism is understood as one part of a wider conception of what cities and regions are for — places where people live, where children grow up, where communities sustain themselves over generations — then a substantial reduction in visitor numbers may be a benefit rather than a cost. The Venetian who has lived through the conversion of her neighbourhood into what one critic has called "a kind of three-dimensional postcard" is, on this view, the relevant party whose interests the policy ought to serve.

What seems clear, looking at the early evidence, is that the easy assumption of the twentieth century — that tourist arrivals are by their nature a benefit to be maximized — has not survived the experience of the last two decades. Whether the more difficult conversation that has begun to replace it will produce coherent policy, or merely the gradual decay of the destinations that the older assumption helped to create, depends on the willingness of host communities to articulate, and of distant visitors to respect, a more demanding account of what travel ought to be for.

Q1. According to the first paragraph, how did the cities and regions receiving international tourists tend to regard them in the twentieth century?

- ① As a serious threat to be regulated.
- ② As an unalloyed asset bringing hard currency, employment, and the confirmation of the host community's importance.
- ③ As foreign agents to be excluded.
- ④ As students to be educated by the host community.

Q2. What problems are residents of cities like Venice, Barcelona, Dubrovnik, and Kyoto's Gion now expressing?

- ① That they cannot cross their own city centres without being elbowed off pavements, that grocery shops have been replaced by souvenir stands, that rents have risen due to short-term rentals, and that daily textures are being erased.
- ② That tourists tip too generously.
- ③ That tourists fail to take enough photographs.
- ④ That tourist numbers have fallen too sharply.

Q3. Why does the author call overtourism an "unusually pure example" of a tragedy of the commons?

- ① Because each individual tourist's marginal damage seems negligible to her, while the aggregate effect of all tourists is the cumulative degradation of the very experience each had hoped to have.
- ② Because tourists deliberately try to destroy the places they visit.
- ③ Because tragedy of the commons applies only to fictional television series.
- ④ Because economists invented overtourism.

Q4. What is one disadvantage the author identifies in the strategy of imposing visitor caps?

- ① Caps make the affected destinations more famous.
- ② Caps raise difficult questions about who gets to enter, on what basis, and at what price — auctioning favours the affluent, lotteries are even-handed but uncontroversial, and complex rationing risks capriciousness.
- ③ Caps require building larger airports.
- ④ Caps eliminate all tourist revenue immediately.

Q5. Why is the second strategy — redistributing tourism in space and time — limited in its effectiveness?

- ① Because lesser-known cities have no tourist accommodations whatsoever.
- ② Because the very characteristics that make a destination famous — the postcard view, the universally recognized image — are not easily reproduced elsewhere, so only the more thoughtful fraction of visitors will accept the recommendation to go elsewhere.
- ③ Because tourists do not have access to maps.
- ④ Because international flights cannot be rescheduled.

Q6. Which of the following best summarizes the author's overall conclusion?

- ① Tourism should be completely banned to protect host communities.
- ② The twentieth-century assumption that tourist arrivals are an unalloyed benefit has not survived the last two decades; whether the more difficult conversation will produce coherent policy or merely the gradual decay of destinations depends on host communities articulating, and distant visitors respecting, a more demanding account of what travel ought to be for.
- ③ Tourism is purely beneficial and the problems described in the passage have all been solved.
- ④ Only the wealthy should be allowed to travel internationally.

オーバーツーリズム — 観光の commons 悲劇

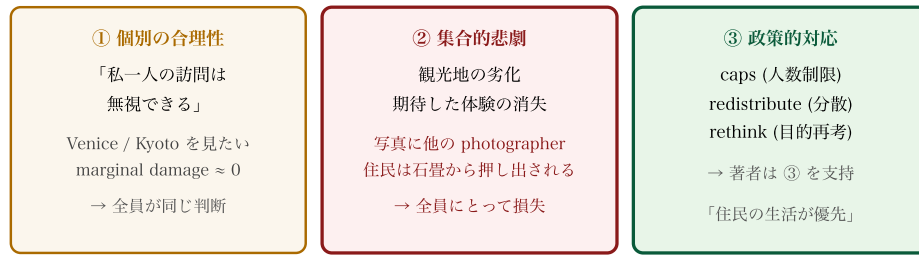

図 1-1 オーバーツーリズム — commons 悲劇と 3 つの政策的対応

第2章 (解法の全体方針と武器整理・3 分)

立教異コミの長文は「楽観 → 反証 → 経済理論的説明 → 政策候補列挙 → 著者の選択 → 概念的含意」の 7 段論法。

【ジャンル分析】

本文は典型的な (A) tourism studies essay。著者は 7 段かけて、観光を「無条件の利益」から「commons 悲劇」へと再定義する。(B) 立教異コミの長文は cross-cultural / globalization テーマが頻出。

【本問で必要な 4 つの武器】

- ① (A) 具体地名の連鎖 (Venice / Barcelona / Dubrovnik / Kyoto) — 普遍化の例示
- ② (B) tragedy of the commons の論理 (個別合理性 vs 集合的破綻)
- ③ (C) 政策候補の比較 (caps / redistribute / rethink purpose)
- ④ (D) 著者の立場 = radical rethink 支持と読む

【各設問の戦略】

Q1 (20 世紀の見方) → 第 1 段 "unalloyed asset"

Q2 (住民の不満) → 第 2 段の具体例リスト

Q3 (commons 悲劇) → 第 3 段 "marginal damage ... too small ... aggregate effect"

Q4 (caps の問題) → 第 4 段 "auctioning ... lotteries ... rationing"

Q5 (redistribute の限界) → 第 5 段 "postcard view ... not easily reproduced"

Q6 (全体結論) → 最終段 "more demanding account of what travel ought to be for"

第3章 (Q1 + Q2 — 20 世紀の楽観 + 住民の不満・8 分)

「歴史的見方 + 現代の反証」を続けて聞く。

【Q1 設問】 How did the cities tend to regard tourists in the twentieth century?

★ 第 1 段の論理

"the cities and regions that received international tourists tended to regard them as (A) an unalloyed asset. Tourists brought (B) hard currency, supported local employment, and confirmed the host community's importance by the simple fact of having travelled to see it."

★ Q1 paraphrase

本文 "unalloyed asset ... hard currency, supported local employment, and confirmed the host community's importance"

選択肢② "an unalloyed asset bringing hard currency, employment, and the confirmation of the host community's importance"

→ 直接対応。

【Q1 正解】 ② As an unalloyed asset bringing hard currency, employment, and the confirmation of the host community's importance.

【Q2 設問】 What problems are residents now expressing?

★ 第 2 段の具体例リスト

- "they could no longer cross their own city centres without being elbowed off the pavement"
- "their grocery shops had been replaced by souvenir stands"
- "their rents had risen as apartments were converted to short-term rentals"
- "the textures of daily life that had made these places interesting in the first place were being quietly erased by the very people who had come to admire them"

★ Q2 paraphrase

本文 4 つの不満 (歩道押し出し / 食料品店 → 土産物店 / 短期賃貸で家賃上昇 / 日常生活の消失)

選択肢① "they cannot cross their own city centres without being elbowed off pavements, that grocery shops have been replaced by souvenir stands, that rents have risen due to

short-term rentals, and that daily textures are being erased"

→ 4 要素すべて対応。

【Q2 正解】① That they cannot cross their own city centres without being elbowed off pavements, that grocery shops have been replaced by souvenir stands, that rents have risen due to short-term rentals, and that daily textures are being erased.

💡 立教異コミの典型: 具体地名 (Venice / Kyoto Gion 等) + 具体不満リスト = 普遍的現象を可視化する技法。

第4章 (Q3 — Tragedy of the Commons 説明・5 分)

「commons 悲劇」の経済理論的説明を読む。

【設問】 Why does the author call overtourism an "unusually pure example" of a tragedy of the commons?

★ 第 3 段の論理

"Each individual tourist, considering only her own decision, has every reason to want to see the famously beautiful place; (A) the marginal damage that her one visit will cause is too small to weigh seriously against the value of seeing the place at all. The same is true of every other tourist."

"The aggregate effect, however, is (B) the cumulative degradation of precisely the experience that any single tourist had hoped to have."

★ paraphrase 対応

本文 "marginal damage ... too small ... aggregate effect ... cumulative degradation ... experience that any single tourist had hoped to have"

選択肢① "each individual tourist's marginal damage seems negligible to her, while the aggregate effect of all tourists is the cumulative degradation of the very experience each had hoped to have"

→ 直接対応。

★ 誤答分析

- ・ ② "deliberately try to destroy" → 本文と (A) 逆方向。観光客は破壊を意図していない。
- ・ ③ "applies only to fictional television series" → (B) Dubrovnik の TV ロケ言及の誤解。
- ・ ④ "economists invented overtourism" → (C) 無関係。経済学者は概念化しただけ。

【正解】 ① Because each individual tourist's marginal damage seems negligible to her, while the aggregate effect of all tourists is the cumulative degradation of the very experience each had hoped to have.

💡 tragedy of the commons = Garrett Hardin (1968) が提唱。共有放牧地に各牧夫が「自分の 1 頭くらい」と思って牛を増やし、結果として全員が損する古典的論理。気候変動・乱獲・公害論の基本枠組み。

第5章 (Q4 + Q5 — Caps と Redistribute の限界・10 分)

「2 つの政策的対応の限界」を続けて聞く。

【Q4 設問】 What is one disadvantage of imposing visitor caps?

★ 第 4 段の論理

"Caps have the advantage of being directly responsive to the problem they address, but (A) they raise difficult questions about who gets to enter, on what basis, and at what price.

Auctioning the limited slots favours the affluent; lotteries deal even-handedly with citizens of vastly unequal means; complex rationing systems risk being administered with the kind of capriciousness that erodes their legitimacy."

★ Q4 paraphrase

本文 "raise difficult questions ... auctioning favours the affluent ... lotteries deal even-handedly ... rationing risks capriciousness"

選択肢② "raise difficult questions about who gets to enter, on what basis, and at what price — auctioning favours the affluent, lotteries are even-handed but uncontroversial, and complex rationing risks capriciousness"

→ 直接対応 (やや細部の整理あり)。

【Q4 正解】 ② Caps raise difficult questions about who gets to enter, on what basis, and at what price — auctioning favours the affluent, lotteries are even-handed but uncontroversial, and complex rationing risks capriciousness.

【Q5 設問】 Why is redistributing tourism in space and time limited?

★ 第 5 段の論理

"The disadvantage is that (A) it works only when visitors can be persuaded; the very characteristics that make a destination famous in the first place — (B) the postcard view, the universally recognized image — are not easily reproduced elsewhere. To recommend that tourists visit lesser-known cities while they continue to crowd the most famous ones is to recommend something that, in practice, (C) only the more thoughtful fraction of visitors will accept."

★ Q5 paraphrase

本文 "works only when visitors can be persuaded ... postcard view ... not easily reproduced elsewhere ... only the more thoughtful fraction"

選択肢② "the very characteristics that make a destination famous — the postcard view, the universally recognized image — are not easily reproduced elsewhere, so only the more thoughtful fraction of visitors will accept the recommendation to go elsewhere"

→ 直接対応。

【Q5 正解】② Because the very characteristics that make a destination famous — the postcard view, the universally recognized image — are not easily reproduced elsewhere, so only the more thoughtful fraction of visitors will accept the recommendation to go elsewhere.

★ 重要観察 — Q4 と Q5 の連動

Q4 = caps の限界 → Q5 = redistribute の限界。 (A) 「2 つの実用的対応が両方とも不十分」 と示すことで、著者は第 6 段の「more radical response」(目的そのものの再考) への論理的橋を架けている。

3 つの対応 — 著者が radical rethink を支持する論理

図 5-1 立教異コミの論理 — 表面的対応の限界を示してから根本的再考を提示

第6章 (Q6 — Main Idea 設問 + 関連話題・10 分)

異コミエッセイの結論は「主体の責任」型 (host + visitor 両方の articulation)。

【設問】 Which of the following best summarizes the author's overall conclusion?

★ 最終段の精読

"What seems clear, looking at the early evidence, is that (A) the easy assumption of the twentieth century — that tourist arrivals are by their nature a benefit to be maximized — has not survived the experience of the last two decades."

"Whether the more difficult conversation that has begun to replace it will produce coherent policy, or merely the gradual decay of the destinations that the older assumption helped to create, depends on (B) the willingness of host communities to articulate, and of distant visitors to respect, a more demanding account of what travel ought to be for."

→ 主旨 3 要素:

- ①20 世紀の楽観は崩壊した (実証)
- ②結果は coherent policy か gradual decay の二択
- ③答えは host + visitor の双方の articulation と respect 次第

★ 選択肢②との対応

"The twentieth-century assumption that tourist arrivals are an unalloyed benefit has not survived the last two decades; whether the more difficult conversation will produce coherent policy or merely the gradual decay of destinations depends on host communities articulating, and distant visitors respecting, a more demanding account of what travel ought to be for."

→ 3 要素すべて含む。

【正解】 ② The twentieth-century assumption that tourist arrivals are an unalloyed benefit has not survived the last two decades; whether the more difficult conversation will produce coherent policy or merely the gradual decay of destinations depends on host communities articulating, and distant visitors respecting, a more demanding account of what travel ought to be for.

第7章 (異コミ英語 攻略のコツ・5 分)

立教異コミ長文を完答するための 5 つの技術。

【コツ 1】 7 段論法 (楽観 → 反証 → 経済理論的説明 → 政策候補列举 → 著者の選択 → 概念的含意) を予測

異コミエッセイは「グローバル現象 × ローカル住民」の対立を扱う。各段の役割を識別。

【コツ 2】 異文化コミュ・観光学の固有名詞

- ・ (A) Venice / Barcelona / Dubrovnik / Kyoto Gion / Amsterdam — 典型的 overtourism 都市
- ・ (B) Hardin (commons) / Ostrom (共同管理) / Urry (tourist gaze) — 理論家
- ・ (C) UNESCO World Heritage / UNWTO — 国際機関
- ・ (D) Airbnb / Booking.com / Game of Thrones — 観光圧力を増幅するプラットフォーム/メディア

【コツ 3】 立教異コミ頻出語の文脈推測

unalloyed / hard currency / tragedy of the commons / marginal damage / aggregate effect / cap / redistribute / capriciousness / postcard view / articulate

【コツ 4】 誤答パターン 4 種 (異コミ版)

- ・ (A) 極端化: completely banned / only the wealthy / purely beneficial / immediately
- ・ (B) 行動指針の押し付け: tourists must / governments should — 著者は分析者
- ・ (C) 逆方向: 観光客が deliberately 破壊 / 住民が tourists を welcome
- ・ (D) 論点ずれ: 航空業界の利益・空港運営・地理学的詳細

【コツ 5】 時間配分 (立教異コミ 75 分)

長文には(A) 25 分を上限。リスニング・文法問題と並行配分。

【最後にひとこと】

立教異コミの英語は(A) 語学試験であると同時に(B) 異文化コミュニケーション・観光社会学リテラシー試験。本問の overtourism 論は、入学後に学ぶインターカルチュラル・コミュニケーション論の核心テーマ。

第8章 (類題チャレンジ・10 分) [10 点]

本講義の手法を応用する 5 問。

(類題 1) 本文中の "unalloyed asset" の意味として最も近いものを選びなさい。

- ① 純粋な (混じり気のない) 資産・恩恵
- ② 金融デリバティブの一種
- ③ 外資系企業の資産
- ④ 農業土地の所有権

(類題 2) 本文の "tragedy of the commons" が示すものとして最も適切なものを選びなさい。

- ① 共有資源を巡る個別合理性が集合的破綻を生む状況
- ② 古典演劇のジャンル
- ③ 庶民の不幸を扱う文学作品
- ④ 国際機関の運営失敗

(類題 3) 本文中で Dubrovnik が引用される目的として最も適切なものを選びなさい。

- ① 人気テレビ番組のロケ地として観光圧力を受ける都市の例
- ② クロアチアの首都として
- ③ 古代ローマの遺跡として
- ④ EU 加盟交渉の現場として

(類題 4) 本文の "three-dimensional postcard" が示唆するものとして最も適切なものを選びなさい。

- ① 観光客のためだけに保存されたが、住民の日常を失った都市の比喻
- ② AR 技術を使った新型郵便制度
- ③ 立体的な観光土産物
- ④ 建築様式の一つ

(類題 5) 本文の論理構成として最も近いものを選びなさい。

- ① 20 世紀の楽観 → 反証 (overtourism 概念) → 経済理論的説明 (commons) → 政策候補 (caps/redistribute) → 著者の選択 (rethink purpose) → 主体の責任の概念的含意
- ② 結論先出し → 根拠列挙のみ
- ③ 賛成意見の単純な列挙
- ④ 歴史的説明のみで結論なし

第9章 (まとめ・宿題・5 分)

今日の核心整理と立教異コミ本番に向けた宿題

【本日の核心 5 か条】

- ① 異コミエッセイは (A) 「グローバル現象 × ローカル住民」の対立 を扱う。7 段論法で構造化。
- ② (B) tragedy of the commons は環境・観光・公衆衛生エッセイの核心概念。Garrett Hardin (1968)。
- ③ (C) 具体地名の連鎖 (Venice/Kyoto Gion 等) で普遍的現象を可視化する技法。
- ④ 政策候補の (D) negative-positive 構成 (caps × / redistribute × / rethink ○) が論理骨格。
- ⑤ 主旨設問は (A) 「host + visitor 双方の責任」型 を選ぶ。「completely banned / only the wealthy」は罣。

【宿題】

- ① 本講義の Q1-Q6 を見ないで本文だけ読み直し、自分で 6 問の設問を作成。
- ② 類題 5 問を解き直し、本文 7 段の各段にひと言タイトルを書き出す。
- ③ 過去問: 立教大学 異文化コミュニケーション学部 英語 (過去 5 年分) から長文 1 題を選び、本日の手法で精読する。

【次回授業】 立教異コミの英作文 (200 words 程度) — "Should Kyoto introduce a daily limit on tourist numbers?" の論理構成

【最後にひとこと】

立教異コミの英語は (A) 語学試験 であると同時に (B) インターカルチュラル・コミュニケーション・観光社会学リテラシー試験。本問の overtourism 論は、入学後に学ぶ国際観光・地域研究の核心テーマ。
