自習用プリント (解答・解説付き / 90 分・75 点満点)

2026 年 5 月 26 日

高校 3 年 / 浪人生 (上級)

英語 (私大難関対策 — 文化構想学部水準)

Trillion 塾

大問 I — Cloze (空所補充) [配点 15 点]

次の英文を読み、空所 (1) ～ (5) に入れるのに最も適切なものを、それぞれの選択肢①～④の中から一つずつ選びなさい。(各 3 点)

In many Western cultures, silence in conversation is often interpreted as a sign of awkwardness or even hostility. When a pause stretches beyond a few seconds, participants feel pressured to fill the void with words — any words — to keep the social machinery running. Television talk shows are designed around this anxiety, with hosts trained to (1) dead air at all costs. In contrast, many East Asian cultures regard silence as an essential component of meaningful exchange.

Among the Japanese, for example, the concept of "ma" — a deliberate, charged pause — is woven into music, theater, and everyday speech. A skilled negotiator may say nothing for several minutes in the middle of a discussion, not out of confusion but in order to (2) the gravity of what has just been said. The Finns, similarly, are known for valuing silence as a sign of thoughtfulness; a quick reply may even be considered rude, suggesting that the speaker has not bothered to think carefully before opening the mouth.

Linguistic anthropologists argue that these differences are not merely matters of national temperament. Instead, they reflect (3) assumptions about what language itself is for. Cultures that prize talk see language primarily as a tool for building relationships and projecting personality; cultures that prize silence see it primarily as a vehicle for transmitting carefully considered information. Neither view is, in any absolute sense, more natural than the other.

What complicates matters today is that global media — overwhelmingly produced in talk-prizing societies — have begun to (4) the verbose style worldwide. Even in Tokyo, young people raised on American sitcoms are noticeably more talkative than their grandparents were at the same age. The traditional appreciation of silence is not disappearing, but it is being (5) into a smaller and smaller corner of daily life.

(Original — composed for Trillion 塾 self-study set)

Notes:

dead air — (放送中の) 無音時間

temperament — 気質、性向

verbose — 言葉数の多い、冗長な

sitcom — シチュエーション・コメディ

大問 I — Cloze (空所補充) — Questions

Q1 1

空所 (1) に入れるのに最も適切なものを選びなさい。

- ① avoid
- ② prolong
- ③ celebrate
- ④ imitate

Q2 2

空所 (2) に入れるのに最も適切なものを選びなさい。

- ① dismiss
- ② underscore
- ③ lighten
- ④ ridicule

Q3 3

空所 (3) に入れるのに最も適切なものを選びなさい。

- ① identical
- ② superficial
- ③ differing
- ④ universal

Q4

4

空所 (4) に入れるのに最も適切なものを選びなさい。

- ① suppress
- ② export
- ③ regulate
- ④ abandon

Q5

5

空所 (5) に入れるのに最も適切なものを選びなさい。

- ① welcomed
- ② amplified
- ③ relegated
- ④ restored

大問Ⅱ (A) — Short Reading [配点 12 点]

次の英文を読み、後の問いに答えなさい。(各 4 点)

For decades, comic books — and the longer, more ambitious works often called graphic novels — were dismissed by serious critics as a juvenile distraction, fit only for children and for adults who refused to grow up. The presence of pictures, the argument ran, indicated a lack of confidence in language; real literature, the critics insisted, relied on words alone, and the imagination of the reader supplied the rest.

That orthodoxy has been quietly overturned. Works such as Art Spiegelman's *Maus*, a memoir of the Holocaust drawn in the visual language of animals, and Marjane Satrapi's *Persepolis*, set against the Iranian Revolution, have been welcomed into university curricula and discussed in the same critical journals that once ignored the form. Pulitzer juries, MacArthur foundations, and the Library of Congress have all granted graphic novels the recognition that the literary establishment long withheld.

The shift is not merely a matter of widening taste. Defenders of the form argue that the combination of word and image is not a regression to a "lesser" medium but an extension of literature into territory that prose alone cannot reach. A single panel can hold a character's spoken words, an unspoken thought, and a glance — all at the same moment, in a way that no paragraph can quite match.

Notes:

orthodoxy — 正統的見解、通説

curriculum (pl. curricula) — カリキュラム、教育課程

regression — 退行、逆戻り

大問 II (A) — Short Reading — Questions

Q6

6

What was the traditional critical view of graphic novels?

- ① They were considered superior to ordinary prose fiction.
- ② The use of pictures was taken to show a lack of confidence in language.
- ③ They were dismissed because their readers could not afford ordinary books.
- ④ They were judged too short to count as literature.

Q7

7

Which of the following is NOT cited in the passage as evidence of the form's new legitimacy?

- ① Inclusion in university curricula.
- ② Recognition by Pulitzer juries.
- ③ The commercial success of film adaptations.
- ④ Recognition by the Library of Congress.

Q8

8

According to the passage, what do defenders of the form argue is the chief advantage of combining word and image?

- ① It makes books cheaper to produce and distribute.
- ② It allows speech, unspoken thought, and gesture to be presented in a single moment.
- ③ It eliminates the need for skilled translators.
- ④ It returns literature to a simpler, pre-modern form.

大問 II (B) — Short Reading [配点 12 点]

次の英文を読み、後の問いに答えなさい。(各 4 点)

A familiar question presses on universities every few years: why should public money support the study of medieval poetry, abstract mathematics, or the migration patterns of obscure birds? Surely, the critics suggest, scarce funds ought to flow toward subjects with measurable economic return — engineering, business, biomedical research.

The reply offered by Abraham Flexner, an American educator writing in 1939, has lost none of its force. Flexner pointed out that the most consequential technologies of his era — radio, electric power, even the elementary mathematics underlying modern banking — had grown out of inquiries that, at the time of their discovery, seemed entirely impractical. Faraday, playing with magnets, was not trying to invent the electrical grid. Maxwell, writing equations about invisible fields, was not designing a radio.

Useful knowledge, in other words, rarely announces itself in advance. The history of science suggests that breakthroughs travel from the curious to the practical along routes no one can predict. Cutting funding to the apparently "useless" disciplines is therefore not a way of being efficient; it is, rather, a way of starving the soil from which future utilities must one day grow. A society that demands an immediate return on every act of curiosity may eventually find that there is nothing left to harvest.

Notes:

Abraham Flexner — 米国の教育学者 (1866-1959)

consequential — 重大な、影響の大きい

discipline — 学問分野

大問 II (B) — Short Reading — Questions

Q9

9

What concern do the critics in the first paragraph raise?

- ① That public universities are not selective enough in their admissions.
- ② That public money should be directed toward subjects with measurable economic return.
- ③ That medieval poetry departments have become too large.
- ④ That science departments rely too heavily on private donations.

Q10

10

Why does the author refer to Faraday and Maxwell?

- ① To suggest that nineteenth-century scientists were better trained than today's.
- ② To argue that physics has always been more important than engineering.
- ③ To show that practical technologies often emerge from inquiries that initially appear useless.
- ④ To indicate that British scientists dominated the era.

Q11

11

Which sentence best captures the author's overall argument?

- ① All academic disciplines deserve identical funding regardless of merit.
- ② Practical disciplines such as engineering are systematically overrated.
- ③ Cutting support for apparently useless studies undermines the source of future useful knowledge.
- ④ Universities should depend mainly on private rather than public funding.

大問 III — Long Reading [配点 24 点]

次の英文を読み、後の問いに答えなさい。(各 4 点)

For most of the nineteenth century, the public museum was understood — by its founders, its visitors, and its critics alike — as a kind of temple. Its grand stone facades, vaulted ceilings, and hushed galleries borrowed self-consciously from ancient architecture, suggesting that the objects displayed within belonged to a higher order of reality than the noisy commercial street outside. The museum was where a nation kept its treasures, both physical and spiritual; to walk through its doors was, in some sense, to enter a chamber of collective memory.

That confident model has come under sustained pressure over the past fifty years. Critics from a wide range of disciplines — anthropology, postcolonial studies, art history — have asked uncomfortable questions about whose memories, exactly, the great national museums preserve. Many of the objects in the British Museum, the Louvre, and the Metropolitan Museum of Art were acquired during periods of colonial expansion, often under circumstances ranging from coercion to outright theft. When the Parthenon marbles sit in London rather than Athens, or the Benin Bronzes in Berlin rather than in Nigeria, the museum is not simply storing memory; it is also, in a sense, shaping which memory is allowed to count and where.

In response, some institutions have begun to repatriate contested objects, returning them to descendants or to the nations from which they were taken. Others have stopped short of physical return but have rewritten the labels in their galleries, openly acknowledging the violent histories behind acquisitions that, a generation ago, were presented as the harmless result of scholarly enthusiasm. Still others, defending what is sometimes called the encyclopedic ideal of the universal museum, argue that gathering the world's artifacts under a single roof allows comparisons impossible in any one country and that the loss of this synoptic view would impoverish humanity as a whole.

Beneath these debates lies a deeper question about what a museum is fundamentally for. The temple model assumed that the museum simply preserved a heritage that already existed, neutral and ready-made. Contemporary theorists argue that the museum is far more active than that: in choosing what to display, what to label, what to highlight, and what to hide in storage, it produces the very heritage it claims merely to preserve. A culture's "memory" is, at least in part, a creation of the institutions that curate it.

This view does not necessarily condemn museums; it simply changes our expectations of them. If a museum is an author rather than a librarian, then visitors are entitled to ask who is writing, on whose

behalf, and to what end. Many newer museums — the National Museum of African American History and Culture in Washington, the Jewish Museum Berlin, the Hiroshima Peace Memorial Museum — have been designed with these questions in mind, foregrounding the perspective of those whose memories were once marginalized.

It is unlikely that the older, temple-style museums will disappear. Their architecture is too imposing, their collections too valuable, their place in tourism economies too central. But the meaning of the visit has shifted. A thoughtful visitor today walks through such a gallery not only to admire the objects on display but also to wonder about the objects not on display, the histories left out of the labels, and the voices the building has long left silent. In that double awareness, the museum begins to do something nineteenth-century critics never quite imagined: it teaches us not only what to remember, but also how memory itself is made.

(Original — composed for Trillion 塾 self-study set)

Notes:

facade — 建物の正面

postcolonial — ポストコロニアルの、脱植民地主義の

repatriate — 本国へ返還する

encyclopedia — 百科事典的な、網羅的な

synoptic — 全体を一望できる、共観的な

curate — (展示や情報を) 取捨選択して構成する

大問 III — Long Reading — Questions

Q12 **12**

What metaphor was traditionally used to describe the public museum, according to the first paragraph?

- ① A laboratory.
- ② A library.
- ③ A temple.
- ④ A theater.

Q13 **13**

Which of the following best captures the concern raised by postcolonial critics?

- ① That museum architecture is too expensive to maintain.
- ② That many artifacts in great national museums were acquired through colonial coercion or theft.
- ③ That admission fees exclude poorer citizens from visiting.
- ④ That objects in major museums are inadequately protected from damage.

Q14 **14**

According to the defenders of the universal museum, what is the value of gathering the world's artifacts in one place?

- ① It generates the largest possible tourist revenue for the host country.
- ② It enables cross-cultural comparisons that no single-country collection could offer.
- ③ It guarantees a higher standard of conservation than smaller museums can achieve.
- ④ It preserves the political influence once held by colonial powers.

Q15 **15**

What is the central claim of the "contemporary theorists" cited by the author?

- ① Museums merely transmit a fixed cultural memory without altering it.
- ② Museums actively construct, rather than simply preserve, cultural heritage.
- ③ Museums should be replaced wherever possible by digital archives.
- ④ Museums ought to confine themselves strictly to non-political subject matter.

Q16 **16**

Why does the author mention the Jewish Museum Berlin and the Hiroshima Peace Memorial Museum?

- ① To suggest that newer museums have abandoned the use of physical artifacts.
- ② To illustrate institutions designed to foreground perspectives that older museums marginalized.
- ③ To criticize the reliance of those museums on public funding.
- ④ To show that twentieth-century museums focus only on military themes.

Q17 **17**

Which of the following best summarizes the author's overall conclusion?

- ① The traditional museum model has been completely discredited and should be abandoned.
- ② Visitors ought to boycott museums that contain any disputed collections.
- ③ Older museums will survive, but their meaning has shifted — they now also reveal how memory itself is constructed.
- ④ Public museums should restrict themselves to representing strictly local history.

大問 IV — Summary Writing (要約英作文) [配点 12 点]

次の英文の要旨を、60～80 語の英語で要約しなさい。本文の表現を丸写しせず、できるだけ自分の言葉に置き換えて書くこと。(12 点 / 内容 6 点・語彙構文 4 点・文法と語数遵守 2 点)

For centuries, philosophers and novelists wrote of the great city as a place of freedom precisely because it offered anonymity. Unlike the village, where every resident knew one's family history, the city allowed a person to walk among strangers without being defined by past mistakes, social rank, or the expectations of one's parents. A young woman who had been gossiped about in her hometown could, on arrival in the metropolis, become simply another face in the crowd — and reinvent her life accordingly.

Yet the same anonymity that frees the individual can also isolate. Sociologists have long observed that residents of large cities often feel less supported than those of smaller communities, less sure that anyone would notice if they vanished. The neighbors across the corridor remain strangers for decades. Acts of cruelty in public spaces are sometimes ignored not out of indifference but out of a learned uncertainty about whether anyone else cares enough to intervene.

The city's gift of anonymity, in other words, comes with a hidden cost. The very condition that liberates the individual from suffocating attention can also leave that individual unsupported when attention is most needed.

Notes:

anonymity — 匿名性

metropolis — 大都市

indifference — 無関心

intervene — 介入する、間に入る

大問 IV — Summary Writing (要約英作文) — Questions

Q18 **18**

上記の英文の要旨を 60～80 語の英語で要約しなさい。下の解答欄に書き、語数を末尾に () で示しなさい。

解答・解説

問	解答	解説
1	①	avoid。テレビ司会者は dead air (放送事故的な無音) を「あらゆる手段で避ける」よう訓練されている、の流れ。② prolong (引き延ばす) / ③ celebrate / ④ imitate は不自然。
2	②	underscore = 「(直前に発せられた言葉の) 重みを強調する」。沈黙によって直前の発言の gravity を際立たせる、というのが日本の「間」の使い方。① dismiss (退ける) / ③ lighten (軽くする) / ④ ridicule (嘲る) は文脈逆行。
3	③	differing。沈黙を尊ぶ文化と発話を尊ぶ文化は、言語の役割について「異なる」前提を反映している、と続く対比で明示。① identical / ④ universal は反対の意味、② superficial は「表面的」で文意に合わない。
4	②	export。発話文化圏で作られた global media が「饒舌スタイルを世界中に輸出している」。① suppress (抑える) / ③ regulate (規制する) / ④ abandon (放棄する) では世界中で talkative になる結論に繋がらない。
5	③	relegated。沈黙への伝統的評価は消滅してはいないが「より小さな隅へと追いやられている」。be relegated into ~ で「～へ降格・押し込められる」。① welcomed (歓迎) / ② amplified (拡大) / ④ restored (回復) は

問	解答	解説
		いずれも本文の悲観的なトーンと矛盾。
6	②	本文 "The presence of pictures ... indicated a lack of confidence in language" の直接言い換え。① は逆、③④ は本文に根拠なし。
7	③	NOT 設問。本文に挙がる正統化の証拠は (i) 大学カリキュラム、(ii) Pulitzer 賞、(iii) Library of Congress の3つ。「映画化作品の興行成功」には全く言及がない。
8	②	最終段「A single panel can hold a character's spoken words, an unspoken thought, and a glance — all at the same moment」を直訳的に言い換えた選択肢が②。
9	②	第1段「scarce funds ought to flow toward subjects with measurable economic return」をそのまま言い換えた選択肢。
10	③	Faraday・Maxwell の例は、当時 impractical に見えた研究 (磁石遊び・場の方程式) が後に電力網・無線通信を生んだという「useful knowledge rarely announces itself in advance」を裏付ける例。
11	③	結論部「Cutting funding ... is a way of starving the soil from which future utilities must grow」と「demands an immediate return ... nothing left to harvest」をまとめた選択肢。① は too broad、② は本文趣旨と逆、④ は本文に根拠なし。

問	解答	解説
12	③	第1段冒頭 "was understood ... as a kind of temple" が決め手。temple モデルが本文の主要なメタファー。
13	②	第2段「acquired during periods of colonial expansion, often under circumstances ranging from coercion to outright theft」の直接言い換え。
14	②	第3段末「gathering the world's artifacts under a single roof allows comparisons impossible in any one country」を簡潔に表現した②。
15	②	第4段「it produces the very heritage it claims merely to preserve」が contemporary theorists の核心的主張。「保存している」のではなく「作っている」というパラダイム転換。
16	②	第5段末「foregrounding the perspective of those whose memories were once marginalized」をそのまま言い換え。
17	③	最終段「It is unlikely that the older, temple-style museums will disappear ... But the meaning of the visit has shifted ... it teaches us not only what to remember, but also how memory itself is made」を網羅した選択肢。
18	(下の解答例参照)	本文は (i) 都市の匿名性が個人に自由と再出発を与える側面と、(ii) 同じ匿名性が孤立や無関心を生む側面の二面性を述べ、最後に両者は分かちがたく結びついていると結ぶ「二面性論」。要約はこの2点＋結論を3文程度で paraphrase 必須。

■ 要約英作文 解答例 (70 words 程度)

採点の3軸: ①「自由と孤立の二面性」が両方含まれているか / ②「同じ匿名性が両側面の原因」という因果が示されているか / ③ 本文表現の丸写しでなく自分の語に置き換えているか。"anonymity"自体は不可避なのでキー語として使ってよいが、"reinvent" "indifference" "isolate"等は別表現に言い換えると高評価。

Cities have long been praised for the freedom that anonymity affords: newcomers can escape the judgments of their hometowns and remake themselves among strangers. However, this same anonymity has a darker side. Urban residents often feel that no one would notice if they disappeared, and witnesses to public cruelty hesitate to step in, unsure whether others share their concern. Thus the liberty offered by the city is inseparable from a distinctive form of loneliness. (71 words)

採点メモ: 第1文 = 自由側面 / 第2-3文 = 孤立側面 (notice 不在 + 介入ためらい) / 第4文 = 結論 (二面性の不可分性) という3段構成が理想。原文 "reinvent" → "remake themselves" / "indifference" → "loneliness" / "intervene" → "step in" 等の paraphrase で語彙力をアピール。

減点ポイント例: 「自由」しか書かない (内容 -3) / 80語超過 (語数 -1) / "anonymity" を一度も使わずキー概念がぼやける (内容 -1) / 本文1文丸写し (語彙 -2)。

■ 学習ポイント (自習者向け)

大問 I (Cloze): 文構造で消去するのではなく **意味の方向 (賛否・対比・因果)** を読み取って候補を絞る。本問の③ differing / ⑤ relegated のような上級語彙は **過去問頻出 200 語** リストで先に潰しておく。

大問 II: 文構の短文読解は「**本文と選択肢の言い換え対応**」が命。本文の表現と選択肢の単語が一字一句一致することはほぼ無く、必ず別の語で同じ意味を表す。たとえば Q8 では本文 "spoken words, unspoken thought, and a glance" → 選択肢 "speech, unspoken thought, and gesture" の対応が見抜けるか。

大問 III (Long Reading): 文構の長文は **段落ごとの主張をひと言でメモ** しながら読む習慣を。本問なら ① temple モデル → ② postcolonial 批判 → ③ 3つの対応策 → ④ 「保存」から「創造」へ → ⑤ 新世代博物館 → ⑥ 二重認識への移行、と段ごとに見出しを付ければ Q17 (主旨) は本文を見返さずに解ける。

大問 IV (要約英作文): 文構の summary 問題は「**対比・二面性**」が頻出構造。本問のように「freedom と isolation の二面性」、「technology の利と害」、「globalization の light/shadow」など、対比を2文 + 結論1文 = **3文構成** がテンプレート。

時間配分の目安 (90 分): I = 15 分 / II(A) = 10 分 / II(B) = 10 分 / III = 30 分 / IV = 20 分 / 見直し = 5 分。

Long Reading に最も時間を割く こと。本番でも配点比 $24/75 \approx 32\%$ で最大ブロック。

復習法: 解答合わせの後、(1) 誤答した問題の本文該当箇所に蛍光ペン / (2) 知らなかった語を単語帳化 / (3) 大問 IV の解答例を 3 回音読し、その後 何も見ずに 70 語で書き直す の 3 ステップで完全に自分の力に変える。
