第 I 問

Read the following two passages and choose the most appropriate word or phrase for each item (1~14). Mark your choices (a~d) on the separate answer sheet.

(A) In recent years, urban centers around the world have begun to (1) under the weight of their own growth. Once celebrated as engines of economic (2) and cultural exchange, megacities now face mounting challenges: severe air pollution, inadequate housing, and growing inequality. While suburbs and small towns have struggled with depopulation, large cities have been (3) by people seeking opportunity. Yet this influx has not always translated into prosperity for all. A growing body of research suggests that the benefits of urbanization are increasingly (4) among a small elite, while the majority face stagnant wages and rising costs of living.

The situation has prompted a rethinking of urban policy in many countries. Some cities have experimented with rent control, public transit expansion, and green building standards. Critics, however, argue that these measures merely (5) the surface of a much deeper crisis. They contend that without addressing the underlying (6) of land ownership and capital concentration, any reforms will prove insufficient. Whether megacities can (7) themselves to be both productive and equitable remains, for now, an open question.

(Adapted from a recent essay on urbanization)

(B) The history of reading is, in many ways, the history of the human mind itself. For most of human existence, knowledge was transmitted (8) — through stories told around fires, through songs passed from generation to generation, and through the careful (9) of religious texts in oral traditions. The invention of writing, and later of the printing press, (10) this dynamic. Suddenly, ideas could travel across vast distances and survive long after their authors had died. Reading became not just a skill but a (11) of identity, a marker of education and social class.

In our own era, the act of reading is once again being (12). Digital screens, hyperlinks, and constant notifications have changed how — and how deeply — we engage with text. Many readers report that they find it (13) to focus on long, complex works. Researchers warn that we may

be losing the very cognitive habits that made deep reading possible.
Whether this represents a temporary adjustment or a more profound
shift remains a (14) of intense debate among scholars of literacy.

(Adapted from a study on the cognitive history of reading)

- (1) 1. (a) collapse (b) collide (c) compete (d) conserve
- (2) 2. (a) dependence (b) dominance (c) dynamism (d) dysfunction
- (3) 3. (a) flooded (b) frustrated (c) governed (d) reduced
- (4) 4. (a) concentrated (b) constrained (c) contradicted (d) coordinated
- (5) 5. (a) capture (b) penetrate (c) scratch (d) sustain
- (6) 6. (a) abundance (b) inequality (c) preference (d) sequence
- (7) 7. (a) advise (b) reinvent (c) replicate (d) restrict
- (8) 8. (a) collectively (b) digitally (c) orally (d) randomly
- (9) 9. (a) memorization (b) modernization (c) modification (d)
mortification
- (10) 10. (a) abandoned (b) confirmed (c) overlooked (d) transformed
- (11) 11. (a) detriment (b) deterrent (c) mark (d) sentence
- (12) 12. (a) redefined (b) refused (c) regretted (d) restored
- (13) 13. (a) effortless (b) imaginable (c) impossible (d) instinctive
- (14) 14. (a) bond (b) matter (c) pact (d) verdict

(28点)

[第 I 問 構成図]

(A) Passage

都市・社会論

空所 7 個

(問 1～7)

a～d 選択

(B) Passage

歴史・人文系

空所 7 個

(問 8～14)

a～d 選択

合計 14 問 / 配点 28 点

本番形式: 2 passages × 7 問 = 14 問

考え方

早稲田 文化構想 第 I 問は 2 passages × 7 問 = 計 14 問・選択肢 (a～d) が固定構成。

語彙レベル: TIME/Economist 級 (英検準1～1 級語彙)。難所は (1) コロケーション (rent control, growing inequality 等) と (2) 多義語の文脈絞り込み。

攻略 4 ステップ: 1. パラグラフ全体の論旨を 1 行要約 2. 空所の前後 2-3 語を読み、必要な「品詞 + 意味方向 (正/負)」を確定 3. 4 択それぞれの語義を吟味、文意に合うものに○ 4. 迷ったら コロケーション辞典の語感で判定 (e.g., "rent control" は collocation で固定)

【解答】

(A) 解答 (各 2 点・計 14 点):

#	解答	根拠・解説
1	(a) collapse	「自重で崩壊しそう」 = collapse under the weight of growth
2	(c) dynamism	経済の活力 = economic dynamism (頻出コロケーション)
3	(a) flooded	「人で押し寄せられた」 be flooded by people
4	(a) concentrated	富が少数に集中 = benefits concentrated among a small elite
5	(c) scratch	「表面をかすめるだけ」 scratch the surface (idiom)
6	(b) inequality	「土地所有と資本集中の根本的不平等」
7	(b) reinvent	「自らを再発明できるか」 reinvent itself (頻出)

(B) 解答 (各 2 点・計 14 点):

#	解答	根拠・解説
8	(c) orally	火を囲んで語る = oral transmission (口承文化)
9	(a) memorization	口承伝統 → 記憶による伝達
10	(d) transformed	印刷術がダイナミクスを変えた

#	解答	根拠・解説
11	(c) mark	「教育・社会階級の指標」 mark of identity
12	(a) redefined	デジタル時代に再定義されつつある
13	(c) impossible	集中するのが困難 → ここでは「不可能」が文脈上 best
14	(b) matter	「議論の的」 a matter of intense debate

満点を狙うコツ: - collocation を機械的に押さえる: scratch the surface /
reinvent oneself / matter of debate - 接尾辞からの品詞判定 (-tion / -ity / -ness
は名詞) - 紛らわしい近義語 (concentrated vs constrained) は 方向性 (+/-) で判別

第 II 問

Read the following three passages and mark the most appropriate choice (a~d) for each item (15~24) on the separate answer sheet.

(A) When my grandfather first arrived in this country in the 1950s, he carried with him only a small suitcase and a single book. The suitcase contained his belongings; the book contained, he later told me, his identity. It was a dictionary — not of his native language, but of the language he was determined to master. He read it cover to cover three times during his first year, and by the second year, he was correcting the grammar of his coworkers. Yet despite his linguistic mastery, he never quite shed his accent. To his last day, certain words betrayed his origins, and he wore this betrayal as a quiet badge of honor.

(Adapted from a memoir on immigration and language)

15. Which of the following is NOT supported by the passage? (a) The grandfather considered his dictionary essential to his identity. (b) The grandfather completely lost his original accent over time. (c) The grandfather had only minimal personal possessions when he arrived. (d) The grandfather eventually became more skilled in grammar than his coworkers.

16. What does the phrase "a quiet badge of honor" suggest about the grandfather's accent? (a) He was embarrassed by it and tried to hide it. (b) He was secretly proud of what it represented. (c) He was indifferent to it and rarely thought about it. (d) He was unaware that he still had it.

(B) In economics, the term "moral hazard" refers to a situation in which one party engages in riskier behavior because they do not bear the full consequences of that risk. The classic example involves insurance: a person with comprehensive auto insurance may drive more carelessly than one without, knowing that any accident will be largely covered. Moral hazard is not necessarily a sign of bad character; rather, it reflects a structural imbalance between risk and reward.

The concept gained renewed attention during the 2008 financial crisis. Critics argued that large banks, expecting government bailouts, had taken on excessive risk for years. When the crisis hit, taxpayers ultimately covered much of the cost, while many bank executives faced few personal consequences. This dynamic, critics contended, would

← 頻出 (C) は社会論 / 文化論 / 心理学が多い

incentivize even greater recklessness in the future unless reforms changed the incentive structure.

Yet redesigning incentives is harder than it sounds. Strict regulations can drive activity to less-regulated sectors, while removing safety nets entirely may cause broader economic harm. Economists continue to debate how best to balance protection with accountability.

(Adapted from an economics textbook)

17. According to the passage, moral hazard occurs primarily because (a) people are inherently dishonest and seek to exploit systems. (b) those who take risks do not bear their full consequences. (c) insurance policies are deliberately designed to encourage carelessness. (d) economic systems lack any form of accountability.

18. What does the passage suggest about the 2008 financial crisis? (a) Banks acted carefully but were unfairly blamed. (b) Taxpayers willingly covered the losses. (c) Bank executives faced limited personal accountability for the crisis. (d) Government regulations were strict enough to prevent abuse.

19. Why is reforming the incentive structure described as difficult? (a) Banks refuse to accept any regulation whatsoever. (b) Strict rules may shift risky behavior elsewhere, while removing protections may cause harm. (c) Economists have reached a clear consensus that has been ignored. (d) Taxpayers have lost interest in financial reform.

(C) Throughout history, the concept of leisure has been closely tied to social class. In ancient Athens, philosophy itself was considered a leisure activity, accessible only to those whose material needs were met by the labor of others. Aristotle famously argued that true happiness required not just virtue but also leisure — and that those who toiled all day could not achieve the contemplative life he held to be the highest human good.

This elite framing of leisure persisted for millennia. In medieval Europe, monasteries and aristocratic estates were among the few institutions that protected time for non-productive activities such as reading, prayer, and contemplation. The vast majority of people lived lives of nearly constant labor, with only religious holidays providing brief respite. Leisure, in any meaningful sense, was a privilege of birth.

The Industrial Revolution paradoxically both narrowed and widened this gap. While factory work imposed grueling schedules on the urban poor, it also created a new middle class with disposable income and, eventually, weekends. The 20th century saw the gradual establishment of legal protections for workers' time off — paid vacations, eight-hour workdays, the weekend itself. These developments democratized leisure to an unprecedented degree.

Yet recent research suggests that the democratization of leisure may now be reversing. In wealthy countries, the highly educated and high-earning are increasingly likely to work long hours, often by choice. Meanwhile, those in lower-paying jobs may have more nominal "free time" but lack the resources to use it meaningfully. Some sociologists argue that we are witnessing a strange inversion: leisure has become the new poverty marker, while overwork signals status.

What this means for the future is unclear. Some predict that as automation reduces the demand for human labor, society will be forced to redefine what counts as a meaningful life beyond paid work. Others worry that without intentional policy choices, the inequality of leisure will simply mirror — or amplify — existing economic inequalities.

(Adapted from an essay on the sociology of time)

20. According to the passage, why did Aristotle consider leisure essential to true happiness? (a) Because leisure allowed for entertainment and rest. (b) Because the contemplative life required time free from labor. (c) Because all human beings naturally seek pleasure. (d) Because work was considered morally inferior.

21. What role did monasteries play in the history of leisure? (a) They opposed all forms of non-productive activity. (b) They reserved time for contemplative activities like reading and prayer. (c) They actively spread leisure to all social classes. (d) They worked tirelessly to abolish religious holidays.

22. What was paradoxical about the Industrial Revolution's effect on leisure? (a) It both restricted and expanded leisure depending on social class. (b) It eliminated leisure entirely for everyone. (c) It made leisure mandatory for all workers. (d) It returned leisure exclusively to the aristocracy.

23. What recent reversal does the passage describe? (a) The highly educated are working less than the poor. (b) Leisure has become a marker of poverty while overwork signals status. (c) Weekends have been abolished in wealthy countries. (d) Lower-paying workers now have less free time than the wealthy.

24. What concern do some sociologists express about the future? (a) That automation will create unlimited leisure for everyone. (b) That inequality of leisure may mirror or amplify economic inequality. (c) That paid work will become irrelevant within a decade. (d) That governments will ban all forms of leisure.

(30点)

[第 II 問 3 passage 構成]

(A) 短	(B) 中	(C) 長
200 語	300-400 語	500-700 語
2 問	3 問	5 問
(15-16)	(17-19)	(20-24)
エッセイ系	学術系	論説系

合計 10 問 / 配点 30 点 / 時間 30 分

II 問は 3 passage × 計 10 問の固定構成

考え方

早稲田 文化構想 第 II 問は 3 passages × 計 10 問 が固定構成: - (A) 短 (200 語前後) → 2 問 - (B) 中 (300-400 語) → 3 問 - (C) 長 (500-700 語) → 5 問

内容一致は「本文の言い換え (paraphrase) を見抜く」のが基本。各設問は本文の 特定の段落・特定の文 に根拠を持つ。

ひっかけのパターン: 1. 本文の語句を含むが意味が違う 2. 過剰な強い表現 (all / never / only) 3. 本文に書かれていない情報 (推測しないと選べない) 4. 部分一致 (本文の一部だけ正しく一部が違う)

【解答】

(A) 解答: 15. (b) ← "he never quite shed his accent" → 完全には失わなかった
16. (b) ← "a quiet badge of honor" = 秘かな誇り

(B) 解答: 17. (b) ← 「risk を負った者がその consequence の全部を負わない」が moral hazard の定義 18. (c) ← "many bank executives faced few personal consequences" 19. (b) ← "Strict regulations can drive activity to less-regulated sectors, while removing safety nets entirely may cause broader economic harm"

(C) 解答: 20. (b) ← Aristotle: 「contemplative life には労働から解放された時間が必要」 21. (b) ← "monasteries and aristocratic estates ... protected time for non-productive activities such as reading, prayer, and contemplation" 22. (a) ← Industrial Revolution は「貧困層の労働を増やし・新中産階級に余暇を与えた」両方向 23. (b) ← "leisure has become the new poverty marker, while overwork signals status" 24. (b) ← "the inequality of leisure will simply mirror — or amplify — existing economic inequalities"

満点を狙うコツ: - 設問先読み: 設問キーワード (Aristotle, monasteries 等) を把握
→ 本文で該当箇所を即特定 - 段落単位で読む: 各段落の主旨を 1 行でメモすると参照が早い - 言い換え練習: 「contemplative life」→ 「free from labor」のようなパラフレーズ感覚を養う

第 III 問

Choose the most appropriate sentence from the following list (a~h) for each item (25~31). Mark your choices on the separate answer sheet.

One sentence will not be used.

挿入候補文 (a~h): - (a) But these effects, while measurable, tell only part of the story. - (b) For most of human history, such isolation was not even possible. - (c) It is in conversation, not in solitude, that we discover ourselves. - (d) Modern technology, however, has made it possible to spend days, even weeks, without meaningful contact with another person. - (e) Such friendships, while not equivalent to face-to-face relationships, can provide genuine emotional support. - (f) The question is not whether solitude is good or bad, but how much of it any individual can sustain. - (g) These findings suggest that the human need for connection is as fundamental as the need for food or shelter. - (h) Yet curiously, the same research also shows that the quality of our connections matters far more than the quantity.

本文: Loneliness has emerged as one of the defining public health concerns of the twenty-first century. Studies across multiple countries have linked chronic loneliness to elevated risks of cardiovascular disease, depression, and even premature mortality. (25) The deeper question — why human beings should be so profoundly affected by social isolation — points to something essential about our nature as a species.

Anthropologists note that humans evolved in small, tightly-knit groups in which survival depended on cooperation. (26) Even a few hours of separation from one's group could have meant exposure to predators or starvation. From this perspective, the modern epidemic of loneliness is not merely an emotional problem but a profound mismatch between our evolutionary heritage and our contemporary environment.

(27) Whereas our ancestors lived in constant proximity to others, today's individuals may inhabit apartments, ride public transportation, and work in offices while exchanging barely a word with anyone. This sustained isolation, evolutionarily speaking, is unprecedented.

Researchers studying social bonds have found that brief, even superficial interactions — a friendly greeting from a barista, a chat with a neighbor — can significantly improve mood and reduce stress markers. (28) A

single trusted friendship may protect mental health more effectively than dozens of casual acquaintances. Quality, in other words, beats quantity.

Interestingly, online connections complicate this picture. Some studies suggest that passive social media use (scrolling, observing) correlates with greater loneliness, while active engagement (messaging, video chatting) does not. (29) The key appears to be whether the digital interaction involves real reciprocity — the back-and-forth that characterizes genuine human conversation.

Cultural responses to loneliness vary widely. Some countries have appointed "ministers for loneliness" or funded community programs designed to bring people together. Others have invested in research on the neurological basis of social connection. (30) Most experts agree that no single policy can address the issue alone; meaningful change requires shifts at the individual, community, and societal levels.

Ultimately, the science of loneliness reminds us that we are, at our core, social beings. (31) To recognize this is not weakness but wisdom — and perhaps the first step toward building a society in which fewer people must endure the silent ache of disconnection.

(Adapted from a recent article on the social neuroscience of loneliness)

(1) (25) 該当する選択肢: ____

(2) (26) 該当する選択肢: ____

(3) (27) 該当する選択肢: ____

(4) (28) 該当する選択肢: ____

(6) (30) 該当する選択肢: ____

(7) (31) 該当する選択肢: ____

(21点)

[第 III 問 段落整序の構造]

本文 1 つ + 7 空所 (25~31)

論説/学術系の長文 (500-700 語)

↓ 各空所に最適な 1 文を当てはめる

選択肢 8 個 (a~h)

→ 7 個使う・1 個余る

→ 余る 1 つは紛らわしいダミー

本文 1 つ + 8 選択肢から 7 つを配置

考え方

早稲田 第 III 問は 1 passage に 7 空所 + 8 選択肢 (1 つ余る)。

攻略の鉄則: 1. 接続詞・論理マーカー (However, Yet, Such, These findings...) で前後関係を絞る 2. 指示語の対応 (this, these, such, it) は前文の名詞句を指す 3. 段落の論旨 に対し選択肢が「前提」「展開」「結論」のどれに該当するか判定 4. 余る 1 つ は意図的に紛らわしく作られている → 文脈に最もハマる 7 つを優先確定

時間: 1 問あたり 2 分・全 7 問で 15 分。

【解答】

解答 (各 3 点・計 21 点):

番号	正解	根拠・接続関係
25	(a)	直前で「heart disease 等の effects」が列挙 → "But these effects ... tell only part of the story" で次段への橋渡し
26	(b)	「small, tightly-knit groups で進化」 → 「such isolation was not even possible」で続ける (such = isolation)
27	(d)	直前段「evolutionary heritage との mismatch」 → 「Modern technology, however, has made isolation possible」で具体例
28	(h)	直前「brief interactions が mood 改善」 + 後続「A single trusted friendship が dozens より有効」 → 「quality matters more than quantity」で接続

番号	正解	根拠・接続関係
29	(e)	直前「passive = lonely / active = not」 → "Such friendships, while not equivalent ... can provide genuine emotional support" で online friendships を肯定
30	(f)	直前「policy responses」の列挙後 → 「the question is not whether solitude is good or bad, but how much」で議論を相対化
31	(c)	「we are social beings」 → 「It is in conversation, not in solitude, that we discover ourselves」で結論として呼応

使わない 1 つ: (g) — 「these findings ... need for connection is as fundamental as food or shelter」は内容上有用だが、本文の論理展開のどこにもピッタリと当てはまらない (内容は正しいが配置場所がない)。

満点の鉄則: - 接続詞 (However / Yet / Such) と指示語 (this / these / it) の指示対象を必ず確認 - 段落の主題に対する「論理的役割」(前提/例示/結論)を意識 - 全 7 問を 順番に解かない — 確信ある問から先に埋め、残りを消去法で

第 I V 問

Choose the most appropriate word or phrase from the list (a~m) for each item (32~38). Mark your choices on the separate answer sheet. **Six choices will not be used.**

選択肢 (a~m): - (a) at the drop of a hat - (b) bite the bullet - (c) call it a day - (d) cost an arm and a leg - (e) get cold feet - (f) hit the books - (g) in the same boat - (h) miss the boat - (i) on thin ice - (j) piece of cake - (k) spill the beans - (l) the elephant in the room - (m) under the weather

会話: *Sara*: You look exhausted. Are you alright? *Mike*: Honestly, I've been feeling (32) all week. I think it's the flu.

Sara: Oh no. Are you still going to take the entrance exam tomorrow?

Mike: I have to. I can't (33) on something I've been preparing for all year.

Sara: That's true. Are you all set, then? *Mike*: Not really. I should have (34) harder over the summer instead of relaxing. Now I feel like I'm (35) — one mistake and I'm out.

Sara: Hey, don't talk like that. You'll do fine. Just (36) and get through it. *Mike*: I'll try. To be honest, though, the part I'm most worried about — the essay section — well, that's (37).

Sara: Yeah, I noticed neither of us has talked about it. But listen, we're both (38). My exam is next week and I haven't even started practicing essays. *Mike*: Misery loves company, I guess. Let's both just do our best.

(1) (32) ____

(2) (33) ____

(3) (34) ____

(4) (35) ____

(5) (36) ____

(6) (37) ____

(7) (38) ____

(14点)

← **暗記** イディオム 30
個 + 例文セットで満
点圏

← **教材** 「英会話イデ
ィオム 1000」(松本
茂) が定番

← **ダミー** 6 個余るの
で消去法重要

← **違い** cold feet (直
前で諦める) vs thin
ice (危うい状態)

[頻出イディオム カテゴリ別]

体調・感情:

under the weather (体調不良)
on cloud nine / over the moon (大喜び)
get cold feet (土壇場で怖気)

困難・覚悟:

bite the bullet (覚悟して耐える)
on thin ice (危うい)
miss the boat (機会逃す)

学習・仕事:

hit the books (勉強する)
call it a day (終わりにする)
piece of cake (楽勝)

頻出イディオム カテゴリ別 (10 例)

考え方

早稲田 第 IV 問は 13 個 (a~m) の選択肢から 7 空所 を埋める。6 個は余る → ダミーが多いので消去法重要。

会話イディオムの基本 25 個を 意味 + 例文 で暗記しておけば 7/7 完答可能。

よく出るカテゴリ: 1. 体調・感情: under the weather, on cloud nine, get cold feet 2. 困難・覚悟: bite the bullet, on thin ice, miss the boat 3. 学習・仕事: hit the books, call it a day, piece of cake 4. 対人関係: in the same boat, the elephant in the room, spill the beans

【解答】

解答 (各 2 点・計 14 点):

番号	正解	イディオム意味	文脈
32	(m) under the weather	体調が悪い	"I've been feeling ___ all week. I think it's the flu"
33	(h) miss the boat	機会を逃す	「1 年準備したことで機会を逃せない」
34	(f) hit the books	勉強に励む	「夏にもっと勉強しておくべきだった」

番号	正解	イディオム意味	文脈
35	(i) on thin ice	危うい状況	「一度のミスで out」 = 薄氷の上を歩く
36	(b) bite the bullet	覚悟して耐える	「Just ___ and get through it」
37	(l) the elephant in the room	みんなが避けている明白な問題	「不安だが誰も触れていない essay」
38	(g) in the same boat	同じ境遇	「私も essay 練習してない、同じ立場」

使わない 6 個 (ダミー): - (a) at the drop of a hat (即座に) - (c) call it a day (今日は終わりにする) - (d) cost an arm and a leg (大金がかかる) - (e) get cold feet (土壇場で怖気づく) ← 35 と紛らわしいが「直前で諦める」ニュアンス - (j) piece of cake (簡単) ← 文脈に合わない - (k) spill the beans (秘密を漏らす)

満点のコツ: - イディオム 25-30 個を 例文ごと音読 → 暗記 - 直訳でなく意味で覚える (under the weather ≠ 天気の下) - 紛らわしい (e) get cold feet と (i) on thin ice の使い分け: 前者は「直前で諦める」、後者は「危うい状態」

第 V 問

Read the following passage and complete the English summary in your own words. The beginning of the summary is provided; you must complete it **in 4-10 words**. **Do not use three or more consecutive words from this passage.**

本文: In a small town in northern Italy, there lived a clockmaker named Giovanni who was famous for the precision of his timepieces. People came from miles around to commission his work, and his small workshop was always filled with delicate wheels, springs, and tiny brass tools. Giovanni took pride in his craft, and his clocks were considered the finest in the region.

One day, a wealthy merchant arrived with a strange request: he wanted a clock that would tell not the hours, but the moments of greatest happiness in his life. He explained that he had everything material — houses, land, servants — but felt his life slipping by unnoticed. He wanted, he said, a way to mark and remember the joyful moments before they faded.

Giovanni was puzzled, but the merchant offered an enormous sum. After weeks of thought, the clockmaker began to work. He built a clock unlike any he had made before: it had no hands at all. Instead, on its face, a small wooden bird would emerge from a hidden door whenever a particular tune was hummed nearby — a tune that Giovanni explained the owner must invent for himself, one that, in his heart, signified joy.

The merchant was bewildered. "But how will this clock work?" he asked.

"When you are happy," Giovanni replied, "you will hum the tune. The clock will know. And when years later you wish to remember, you need only hum the tune again, and the bird will appear to remind you that joy is not a thing that happens to you, but a thing you make."

The merchant left, uncertain whether he had been cheated or enlightened. He never returned to complain, but neither did he return to praise. Giovanni went back to making ordinary clocks, occasionally smiling when he thought of his strange creation, which somewhere in the world, perhaps, was still waiting for its owner to hum.

(Adapted from a contemporary fable)

[4-10 語で完成させよ。本文から 3 語以上連続して引用するな。]

(7点)

[第 V 問 要約 5 ステップ]

① 本文の主題を 1 行で要約 (心の中で)

② 教訓 (moral) を抽出

③ 書き出しに続く動詞句を考える

④ 本文の単語を別の語に言い換え

⑤ 4-10 語に収まるか必ず数える

「3 語以上連続引用禁止」が最大の罠

要約問題の解答 5 ステップ

考え方

早稲田 第 V 問は 英語要約 (4-10 語) で 1 文を完成させる記述式。配点は小さい (7 点) が 減点ルール 2 つ厳守: 1. 4-10 語以内 (範囲外は採点対象外) 2. 本文から 3 語以上連続引用禁止 (paraphrase 必須)

攻略法: 1. 本文の主題 (1 行) を掴む (この話は「幸福とは何か」がテーマ) 2. 教訓 (moral) を 1 文で要約 3. 本文の語句を別の単語で言い換える (happy → joy, fortunate, etc.) 4. 書き出し "The story suggests that happiness ..." に自然につながる形

【解答】

模範解答例 (各 4-10 語以内):

(例 1) "The story suggests that happiness ____" → "is created by us, not given to us." (8 語) ✓

(例 2) "The story suggests that happiness ____" → "must be actively chosen and cherished." (6 語) ✓

(例 3) "The story suggests that happiness ____" → "comes from within, not from possessions." (6 語) ✓

(例 4) "The story suggests that happiness ____" → "depends on our own awareness of it." (7 語) ✓

採点ポイント (7 点満点):

観点	配点
4-10 語の範囲遵守	1 点
3 語以上連続引用なし	1 点
「幸福の本質」をテーマに即して把握	2 点
「外から与えられる ≠ 自ら作る/気づく」の核心捕捉	2 点
文法・自然な英文	1 点

減点パターン: - 11 語以上 → 即座に 0 点 - "joy is not a thing that happens to you" を連続引用 → 大幅減点 - 「時計屋が変な時計を作った」など物語の 表層 で止まる → 半分以上減点 - 主語抜け・文法ミス → -1 ~ -2 点

コツ: 「The story suggests that happiness <動詞句>」の形で、`is/comes/depends/requires` 等の本動詞を含む 1 文に。Less is more — 簡潔で本質を突くほど高得点。
