英語が得意な人のための「私大難関本番レベル」— 専門知への信頼の侵食を  
読み解く

2026 年 5 月 26 日

高校 3 年～既卒 (難関私大文系志望)

英語 (早稲田 政治経済学部・本番水準)

Trillion 塾

## 第1章 (例題 — 早稲田大学 政治経済学部レベル・5 分)

本番では 90 分で大問 4 題。本問は長文読解 1 題で 30 分相当 (政経学部の最大配点ブロック)。

【例題】(早稲田大学 政治経済学部 入試 典型形式・改題)

Read the passage and answer the questions that follow.

For most of the twentieth century, the major democracies organized themselves around a tacit bargain with expertise. Citizens elected representatives, but on a wide range of technical questions — what counted as a recession, whether a drug was safe, how an aircraft should be certified — those representatives in turn delegated authority to people whose claim to be heard rested less on votes than on years of specialized training. The system functioned well enough that, for long stretches of time, ordinary voters scarcely noticed it. The expert was simply the person to whom one deferred when a question exceeded the boundaries of common knowledge.

That bargain has visibly frayed. In one democracy after another, polling now finds that majorities of citizens distrust the very institutions that produce expert judgment: the central banks, the regulatory agencies, the public-health bureaucracies, the major universities. Politicians who once styled themselves as managers of complex systems have given way to politicians who campaign explicitly against the systems they propose to administer. "Elites" — a word once used neutrally to describe people with influence — has acquired an almost uniformly pejorative ring. To call a position "expert" in many contemporary debates is, paradoxically, to weaken its claim on public attention.

It would be tempting to attribute this shift to a simple growth of ignorance. The data, however, do not cooperate with so flattering a story. Surveys repeatedly find that the citizens most skeptical of expert institutions are, on average, no less informed than their more deferential neighbors; in several studies, they score somewhat higher on factual knowledge. Their skepticism is not a failure to understand the experts' arguments but a refusal to grant those arguments the deference that the experts believe they are owed. The question that demands serious attention is not why so many citizens have stopped listening, but why so many citizens have stopped trusting.

Several converging pressures suggest themselves. Successive failures — the Iraq War, the 2008 financial crisis, the uneven public-health responses to recent pandemics — have made it possible to point to instances in which the confident verdicts of well-credentialed authorities turned out, in retrospect, to be wrong. Each such episode is an occasion not merely to revise a particular judgment but to wonder whether the entire structure of delegated authority has been more fragile than its custodians acknowledged. Compounding these failures, the same digital infrastructures that diffuse expert findings also diffuse, with no friction, the loudest and most simplifying critiques of them; in such an environment, the painstaking qualifications that real expertise insists upon translate poorly into the attention economy.

A wholesale rejection of expertise would, of course, be self-defeating. Complex societies cannot adjudicate every question through plebiscite; aircraft cannot be certified by referendum. Yet the inverse temptation — to dismiss popular skepticism as mere irrationality, to be educated away or, failing that, to be ignored — risks compounding the very alienation it diagnoses. The citizen who is told that her distrust is itself proof of her incompetence is unlikely to be persuaded; she is likely, instead, to look for political champions who will treat her skepticism as a legitimate political position rather than a defect to be corrected.

If there is a way through, it probably begins with a more honest reckoning by expert institutions themselves: a willingness to specify the limits of their certainty, to acknowledge where their failures came from, and to extend to the public the same standards of transparency that they routinely demand of one another. Trust, once seriously damaged, cannot be restored by reasserting the credentials that produced it. It must, in some measure, be earned again from the beginning — and that, for institutions long accustomed to deference, may be the most difficult work of all.

---

Q1. According to the first paragraph, on what was the twentieth-century bargain between citizens and experts grounded?

- ① A constitutional guarantee that experts would be elected directly by the public.
- ② An implicit understanding that elected representatives would in turn delegate technical questions to specialists.

- ③ A treaty among the major democracies regulating their economic policy.
- ④ A formal contract drawn up by the United Nations after the Second World War.

Q2. Which of the following is NOT cited in the passage as evidence of the erosion of trust in expertise?

- ① Politicians campaigning explicitly against the institutions they propose to administer.
- ② The pejorative use of the word "elites."
- ③ Lower scores on factual knowledge among expert-skeptical citizens compared to deferential ones.
- ④ Declining trust in central banks and public-health bureaucracies.

Q3. What surprising finding emerges from surveys of expert-skeptical citizens?

- ① They are markedly less educated than their more deferential neighbors.
- ② They are, on average, no less informed than their deferential neighbors and sometimes score higher on factual knowledge.
- ③ They belong overwhelmingly to wealthy economic elites.
- ④ They are concentrated almost entirely in rural communities.

Q4. Why does the author mention the Iraq War, the 2008 financial crisis, and recent pandemics?

- ① To argue that experts should be replaced by elected officials in every technical domain.
- ② As specific failures that have given the public concrete reasons to question confident expert verdicts.
- ③ To suggest that those crises were caused chiefly by ordinary voters.
- ④ To demonstrate the unbroken success of expert intervention in modern democracies.

Q5. What is the author's view of dismissing popular skepticism as mere irrationality?

- ① It is the only realistic response available to expert institutions today.
- ② It would be self-defeating and risks deepening the very alienation it diagnoses.
- ③ It must be pursued aggressively through compulsory civic education.
- ④ It has already been shown to restore public trust in expert institutions.

Q6. Which of the following best summarizes the author's overall conclusion?

- ① A wholesale rejection of expertise in favor of direct democracy is the only way forward.
- ② A return to the unconditional deference of the twentieth century should be the goal.
- ③ A more honest reckoning by expert institutions — including transparency about their

limits and failures — offers the most promising path to restoring trust.

④ The transfer of all technical decisions to private corporations would solve the problem.

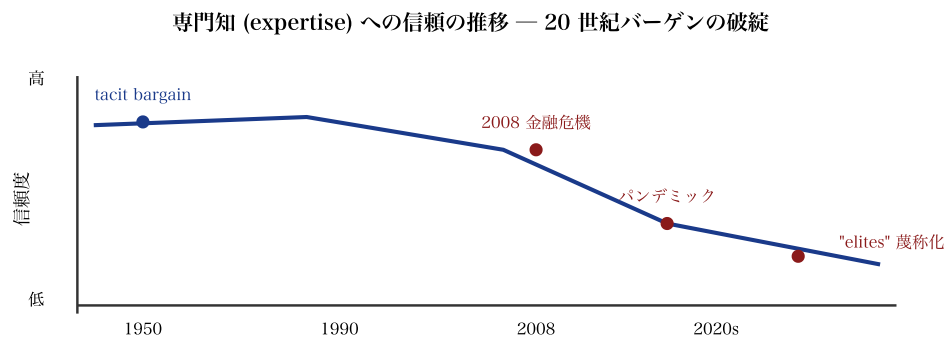

図 1-1 著者が描く信頼度の長期低落 — 連続する失敗 (Iraq War / 2008 / pandemics) が決定打

## 第2章 (解法の全体方針と武器整理・3 分)

政経の長文は「現象記述 → 通説批判 → 真の原因 → 解決提案」の 4 段論法。本問もその枠組みで読む。

### 【ジャンル分析】

本文は典型的な (A) political-economy essay (政治経済論)。著者は 6 段かけて「専門知への信頼の侵食」を分析し、最終的に「expert institutions 側の reckoning が必要」という処方箋を提示する。(B) 政経学部の長文は 4 段論法 (現象 → 通説批判 → 真因 → 提言) が典型。

### 【本問で必要な 4 つの武器】

- ① (A) 現象 → 説明 → 反証 → 処方箋 の論理流れを追う
- ② (B) データ・統計の読み方 — "Surveys repeatedly find / polling now finds" 等の根拠提示文
- ③ (C) 政治経済用語の文脈推測 — "delegated authority" "deferential" "credentialed" "attention economy" 等
- ④ (D) 著者の立場 = 中立的アナリスト + 慎重な処方箋と読む (政経エッセイは「分析 → 政策提言」が王道)

### 【各設問の戦略 — 段との対応】

- Q1 (歴史的背景) → 第 1 段 "tacit bargain ... delegated authority" を抽出  
Q2 (NOT 設問) → 第 2 段の現象列挙から「言及されていない」選択肢を消去法で  
Q3 (意外な発見) → 第 3 段 "no less informed ... somewhat higher" を paraphrase  
Q4 (修辞設問・3 つの事例) → 第 4 段 "Successive failures ... confident verdicts ... turned out ... wrong"  
Q5 (著者の見解・侮蔑論への評価) → 第 5 段 "self-defeating ... compounding the very alienation"  
Q6 (処方箋・全体結論) → 最終段 "honest reckoning ... transparency"

### 【著者の立場 — 政経エッセイの王道】

政経学部の論説は(A) 「現象を冷静に分析 → 通説を反証 → 真の原因を提示 → 控えめな処方箋」の 4 段論法。本問の著者も：

- ・ (a) 現象: expert institutions への信頼低下
- ・ (b) 通説批判: 「無知の増大」では説明できない (skeptics の方が informed)
- ・ (c) 真の原因: 実際の失敗 + 注意経済 (attention economy)
- ・ (d) 処方箋: expert 側の reckoning + 透明性

→ この構造を(B) 第 1-2 段の時点で予測できれば、Q3 (意外な発見) と Q6 (処方箋) は本文の流れだけで解ける。

### 第3章 (Q1 — 20 世紀バーゲンの基盤・3 分)

政経 Q1 は「historical context の特定」。第 1 段の topic sentence で即決。

【設問】 On what was the twentieth-century bargain between citizens and experts grounded?

★ Step 1: 該当段 (第 1 段) を特定

設問語 "twentieth-century bargain" は第 1 段の冒頭に明示:

"For most of the twentieth century, the major democracies organized themselves around a (A) tacit bargain with expertise."

★ Step 2: バーゲンの中身を抽出

"Citizens elected representatives, but on a wide range of technical questions ... those representatives in turn (A) delegated authority to people whose claim to be heard rested less on votes than on years of specialized training."

→ バーゲン = 「市民は代表者を選ぶが、技術的問題は代表者が専門家に委任する」という暗黙の合意。

★ Step 3: paraphrase 対応

本文 "elected representatives ... in turn delegated authority ... specialists"

選択肢② "elected representatives would in turn delegate technical questions to specialists"

→ "in turn delegated" 直接一致、"specialists" 直接一致。

★ Step 4: 誤答分析

- ・ ① "experts would be elected directly" → 本文と (A) 逆方向。専門家は選挙で選ばれない。
- ・ ③ "treaty among the major democracies" → (B) 本文に国際条約の言及なし。誤連想。
- ・ ④ "formal contract ... United Nations" → (C) 本文に UN の言及なし。論点ずれ。

【正解】 ② An implicit understanding that elected representatives would in turn delegate technical questions to specialists.

💡 政経 Q1 のコツ: "tacit" (暗黙の) / "implicit" (暗黙の) は同義語。本文 "tacit bargain" ↔ 選択肢 "implicit understanding" の対応を即座に。

## 第4章 (Q2 — NOT 設問・5 分)

NOT 設問は「本文に言及されていない選択肢」を 1 つ選ぶ消去法問題。

【設問】 Which of the following is NOT cited in the passage as evidence of the erosion of trust in expertise?

### ★ Step 1: NOT 設問の解法フレーム

4 つの選択肢のうち、本文に明確な根拠がない選択肢を 1 つ探す。(A) 消去法 = 本文と一致するものに ○ をつけ、最後に残った × が正解。

### ★ Step 2: 各選択肢を第 2 段と照合

第 2 段の根拠表現を順に拾う:

- (i) "polling now finds that majorities of citizens distrust ... central banks, the regulatory agencies, the public-health bureaucracies"
- (ii) "Politicians who once styled themselves as managers of complex systems have given way to politicians who campaign explicitly against the systems"
- (iii) "'Elites' — a word once used neutrally to describe people with influence — has acquired an almost uniformly pejorative ring."

照合:

- ・ 選択肢① "campaigning explicitly against the institutions" → 根拠 (ii) 下線 A : ○
- ・ 選択肢② "pejorative use of 'elites'" → 根拠 (iii) 下線 A : ○
- ・ 選択肢④ "Declining trust in central banks and public-health bureaucracies" → 根拠 (i) 下線 A : ○
- ・ 選択肢③ "Lower scores on factual knowledge among expert-skeptical citizens" → (B) 本文と逆!

### ★ Step 3: ③ が「逆方向」である決定的根拠

第 3 段: "Surveys repeatedly find that the citizens most skeptical of expert institutions are, on average, (A) no less informed than their more deferential neighbors; in several studies, they score (B) somewhat higher on factual knowledge."

→ 懐疑派は deferential 派より知識が「(C) 同等以上 (no less / somewhat higher)」。選択肢③ "Lower scores" は完全に逆。

【正解】③ Lower scores on factual knowledge among expert-skeptical citizens compared to deferential ones.

💡 NOT 設問は(A) 「本文と矛盾する選択肢」が答えになることが多い。本問の③ は第 3 段の有名な「意外な発見」を裏返した罫で、Q3 の正解の対偶になっている。

## 第5章 (Q3 + Q4 — 意外な発見 + 連続失敗の引用目的・10 分)

本文の「通説批判 → 真因」のコアを 2 問続けて聞く。政経エッセイの典型配置。

【Q3 設問】 What surprising finding emerges from surveys of expert-skeptical citizens?

★ 該当段 (第 3 段) の構造

第 3 段は(A) 通説の反証段落:

- ・ 通説提示: "It would be tempting to attribute this shift to a simple growth of ignorance."
- ・ 反証: "The data, however, do not cooperate with so flattering a story."
- ・ データ提示: "Surveys repeatedly find that the citizens most skeptical of expert institutions are, on average, (A) no less informed than their more deferential neighbors; in several studies, they score (B) somewhat higher on factual knowledge."

★ Q3 の paraphrase 対応

本文 "no less informed than their more deferential neighbors ... score somewhat higher on factual knowledge"

選択肢② "no less informed than their deferential neighbors and sometimes score higher on factual knowledge"

→ "no less informed" 直接一致、"score higher on factual knowledge" 直接一致。

【Q3 正解】 ② They are, on average, no less informed than their deferential neighbors and sometimes score higher on factual knowledge.

★ Q3 誤答の罠

- ・ ① "less educated" → 本文と (A) 逆方向。
- ・ ③ "wealthy economic elites" → (B) 本文に経済階層の言及なし。誤連想。
- ・ ④ "rural communities" → (C) 本文に地域分布の言及なし。誤連想。

---

【Q4 設問】 Why does the author mention the Iraq War, the 2008 financial crisis, and recent pandemics?

★ 該当段 (第 4 段) の構造

第 4 段は(A) 「真の原因」を提示する段落:

"(A) Successive failures — the Iraq War, the 2008 financial crisis, the uneven public-health responses to recent pandemics — have made it possible to point to (B) instances in which the confident verdicts of well-credentialed authorities turned out, in retrospect, to be wrong."

→ 3 つの事件は「専門家の自信ある判断が後で誤りと判明した具体例」として引用されている。

★ Q4 の修辞設問解法

"Why does the author mention X?" → X の引用目的を選ぶ。X は直前/直後の主張の例証。

★ Q4 の paraphrase 対応

本文 "instances in which the confident verdicts ... turned out ... to be wrong"

選択肢② "specific failures that have given the public concrete reasons to question confident expert verdicts"

→ "instances" → "specific failures", "confident verdicts" 直接一致、"turned out wrong" → "question" (信頼を疑う根拠) と対応。

【Q4 正解】② As specific failures that have given the public concrete reasons to question confident expert verdicts.

★ Q4 誤答の罠

・① "experts should be replaced by elected officials" → (A) 極端化。著者は第 5 段で "wholesale rejection ... self-defeating" と否定。

・③ "caused chiefly by ordinary voters" → (B) 本文に責任所在の言及なし。論点ずれ。

・④ "unbroken success of expert intervention" → 本文と (C) 正反対。

★ 重要観察 — Q3 と Q4 の連動

Q3 = 通説 (無知) を反証 → Q4 = 真の原因 (具体的失敗) を提示。この (A) 「反証 → 提示」 連続設問は政経エッセイの中核を聞く。Q3 で「知識不足ではない」と読めれば、Q4 の「では何が原因か」が自然に頭に浮かぶ。

第 3-4 段 — 通説批判 → 真因提示の 2 段ロケット

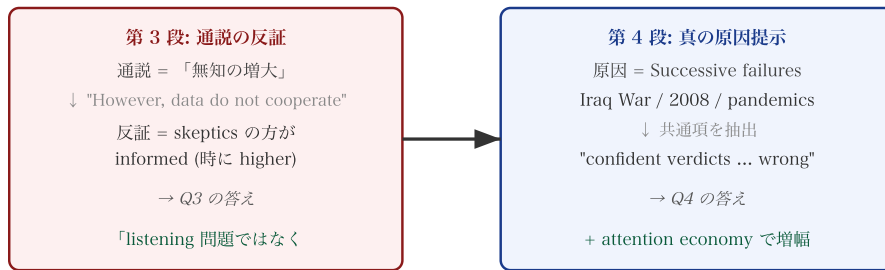

図 5-1 政経エッセイの 2 段ロケット — 通説を撃ち落とし (反証)、新しい解釈枠を提示 (真因)

## 第6章 (Q5 — 著者の見解設問・5 分)

「侮蔑論への評価」を問う設問。第 5 段の {下線A:Yet the inverse temptation} が決定打。

【設問】 What is the author's view of dismissing popular skepticism as mere irrationality?

★ Step 1: 該当段 (第 5 段) を特定

設問語 "dismissing popular skepticism as mere irrationality" は第 5 段に明示:

"Yet the inverse temptation — to (A) dismiss popular skepticism as mere irrationality, to be educated away or, failing that, to be ignored — risks (B) compounding the very alienation it diagnoses."

★ Step 2: 第 5 段の構造を理解

第 5 段は(A) 両極端の批判段落:

- ・前半: "A wholesale rejection of expertise would, of course, be self-defeating." (専門知の全面否定は自己破壊的)
- ・後半: "Yet the inverse temptation — to dismiss popular skepticism ... — risks compounding the very alienation it diagnoses." (懷疑論を非合理と切り捨てるのも逆効果)

→ 著者は両極端 (専門知全否定 / 懷疑論全否定) のどちらも批判する(B) 中道的立場。

★ Step 3: paraphrase 対応

本文 "risks compounding the very alienation it diagnoses"

選択肢② "would be self-defeating and risks deepening the very alienation it diagnoses"

→ "compounding" → "deepening"、"the very alienation it diagnoses" 直接一致。"self-defeating" は前段から来ている (実は前文の wholesale rejection について) が、文脈上、著者はこの態度も self-defeating と見なしている。

★ Step 4: 補強根拠

第 5 段末: "The citizen who is told that her distrust is itself proof of her incompetence is unlikely to be persuaded; she is likely, instead, to look for political champions who will treat her skepticism as a (A) legitimate political position rather than a defect to be corrected."

→ 懐疑論を「欠陥」扱いするとポピュリスト政治家を支持するようになる、という具体的な因果関係を示している。

★ Step 5: 誤答分析

- ・ ① "only realistic response" → (A) 言い過ぎ。著者は否定的に評価。
- ・ ③ "must be pursued aggressively through compulsory civic education" → (B) 本文と逆方向。著者は educated away という発想を批判している。
- ・ ④ "shown to restore public trust" → (C) 本文と逆。むしろ alienation を深めると批判。

【正解】 ② It would be self-defeating and risks deepening the very alienation it diagnoses.

💡 政経エッセイの著者見解設問は「両極端を批判する中道」を選ぶ。「only / aggressively / shown to restore」のような断言調は罠。

## 第7章 (Q6 — Main Idea 設問 + 関連話題・10 分)

「英語が得意な人」はここで差をつける。政経エッセイの結論は「分析 → 提言」の処方箋型。

【設問】 Which of the following best summarizes the author's overall conclusion?

### ★ Step 1: 主旨設問の解法フレーム (政経版)

政経エッセイの結論はほぼ常に:

- (a) 両極端を退ける (本問では「全否定」も「全肯定」も避ける)
- (b) 控えめな処方箋を提示する (本問では「expert 側の reckoning」)
- (c) 困難さを認める (本問では "most difficult work of all")

→ 本問もこの 3 要素を選択肢で探す。

### ★ Step 2: 最終段を精読

"If there is a way through, it probably begins with a (A) more honest reckoning by expert institutions themselves: a willingness to (B) specify the limits of their certainty, to (C) acknowledge where their failures came from, and to (D) extend to the public the same standards of transparency that they routinely demand of one another."

→ 処方箋 = expert institutions 側の (a) 確実性の限界を認める (b) 失敗の原因を認める (c) 透明性を public にも適用 の 3 つ。

最終文: "Trust, once seriously damaged, cannot be restored by reasserting the credentials that produced it. It must, in some measure, be earned again from the beginning — and that, for institutions long accustomed to deference, (A) may be the most difficult work of all."

→ 信頼回復は「最も困難な仕事」と著者は謙抑的に締める。

### ★ Step 3: 選択肢③との対応

"A more honest reckoning by expert institutions — including transparency about their limits and failures — offers the most promising path to restoring trust."

対応関係:

- ・ "honest reckoning by expert institutions" 直接一致
- ・ "transparency about their limits and failures" → 本文 "specify the limits ... acknowledge where their failures came from ... transparency"

・ "most promising path to restoring trust" → 本文 "If there is a way through, it probably begins with"

【Q6 正解】③ A more honest reckoning by expert institutions — including transparency about their limits and failures — offers the most promising path to restoring trust.

★ 誤答分析 (上級者用)

- ・ ① "wholesale rejection ... direct democracy" → (A) 本文と逆。著者は wholesale rejection を self-defeating と否定。
- ・ ② "return to the unconditional deference" → (B) 本文と逆。20 世紀型バーゲンは既に "frayed" と認めている。
- ・ ④ "transfer ... to private corporations" → (C) 本文に企業移譲の言及なし。論点ずれ。

★ 関連話題 — 政経学部進学後への接続

本文のテーマ「専門知への信頼の侵食」は政経学部で学ぶ (A) 政治学・経済学・社会学 の交差点:

- ・ (B) Max Weber "Politics as a Vocation" (1919) — 専門官僚制 (bureaucracy) と政治家のレジティマシー
- ・ (C) Daniel Kahneman "Thinking, Fast and Slow" — 専門家の予測精度の限界 (System 1/2 理論)
- ・ (D) Tom Nichols "The Death of Expertise" (2017) — 本文と同じテーマを単行本化した代表作
- ・ (A) Cass Sunstein "Republic.com" — デジタル時代の「分極化」と政治的合理性
- ・ (B) Hannah Arendt "Truth and Politics" — 政治における真理の問題

→ 本文は実質的にこれらの理論の現代的統合。政経学部で学ぶ「政治学的合理性」「集合的意思決定」の中核。

★ 政経学部の入試がこのテーマを選ぶ理由

- ・ 政経の核心 = (A) 集合的意思決定 (collective decision-making) の制度設計
- ・ 本問は「専門知 vs 民主的参加」という政経の根本問題
- ・ 「正解の単純さ」ではなく「複雑な制度の trade-off を読み解く力」を試している

★ 大学進学後への接続

1 年次: 政治学原論・経済学原論・統計学

2-3 年次: 行政学ゼミ / 政治経済学ゼミ / 公共政策ゼミ

卒論候補: 中央銀行の独立性と民主的正統性 / コロナ禍の公衆衛生政策と科学的助言 / 専門家委員  
会の制度比較

## 第8章 (政経学部英語 攻略のコツ・5 分)

得意な人だからこそ落とせない。政経学部長文を完答するための 5 つの技術。

【コツ 1】 4 段論法 (現象 → 通説批判 → 真因 → 処方箋) を予測する

政経エッセイは 8 割がこの構成。第 1 段で現象 (本問は信頼侵食) を読んだら、(A) 「通説は何か → 著者はそれを反証するはず → 別の真因を提示するはず → 控えめな処方箋で締めるはず」と予測しながら読む。これで Q6 (主旨) は本文後半でほぼ確定する。

【コツ 2】 政経用語 × discourse marker を覚える

- ・ (A) tacit / implicit (暗黙の) — 制度の前提を語る合図 (本問第 1 段)
- ・ (B) It would be tempting to attribute X to Y / The data, however, do not cooperate — 通説反証の合図 (本問第 3 段)
- ・ (C) Successive failures / Compounding these — 真因列挙の合図 (本問第 4 段)
- ・ (D) If there is a way through, it probably begins with — 処方箋提示の合図 (本問最終段)

【コツ 3】 統計・調査表現の文脈推測 (受験頻出 10 語)

政経エッセイで頻出する「データを語る」表現:

polling finds / surveys repeatedly find / data suggest / studies indicate / on average / overwhelmingly / converging pressures / in retrospect / wholesale / pejorative

→ "no less informed" は二重否定 = 「同等以上に informed」というロジック表現。本問 Q3 の鍵。

【コツ 4】 誤答パターン 4 種 (政経版)

- ・ (A) 言い過ぎ: only / wholesale / inevitably / unbroken / aggressively — 政経エッセイは謙抑的なので断定は罣 (例: 本問 Q5①③)
- ・ (B) 極端化: 全肯定/全否定 — 著者は両極を批判する中道が王道 (例: 本問 Q6①②)
- ・ (C) 論点ずれ: 階層 (wealthy) ・ 地域 (rural) ・ 国際関係 (UN) など本文に無い枠組み (例: 本問 Q3③④, Q1③④)
- ・ (D) 逆方向: 著者の主張と反対 (例: 本問 Q2③, Q5④)

【コツ 5】 時間配分の鉄則 (政経学部 90 分)

- ・大問 I (空所補充・整序): 20 分
- ・大問 II (短文読解): 15 分
- ・大問 III (本問の長文 + データ問題): (A) 30-35 分 ← 最大配点ブロック
- ・大問 IV (自由英作文): 15 分
- ・見直し: 5-10 分

【英語が得意な人だからこそ — 最後にひとつ】

政経学部の英語は(A) 語学試験であると同時に(B) 社会科学リテラシー試験。

「expertise vs democracy」「individual rationality vs collective decision」「short-term vs long-term」など、政経の基本対立を頭に入れておけば、本文を読みながら著者の論理が予測できる。

日頃から The Economist の Leaders 欄、Foreign Affairs、Project Syndicate のオピニオン記事を週 1 で読む習慣が、本番で 10-15 点の底上げになる。

## 第9章 (類題チャレンジ・10 分) [10 点]

本講義の手法 (4 段論法予測 + paraphrase 対応 + 政経用語推測) を応用する 5 問。

(類題 1) 本文中の "tacit bargain" の意味として最も近いものを選びなさい。

- ① 明文化された契約
- ② 暗黙の合意
- ③ 敵対的な交渉
- ④ 一時的な休戦

(類題 2) 本文の "attention economy" が含意するものとして最も適切なものを選びなさい。

- ① 人々の注意 (attention) が希少資源として奪い合われる現代メディア環境
- ② 経済学者の研究対象となる注意散漫症
- ③ 中央銀行が管理する経済政策
- ④ 学校教育における集中力訓練

(類題 3) 本文中で著者が "wholesale rejection of expertise" について述べている立場として最も適切なものを選びなさい。

- ① 現代社会で唯一可能な解決策である
- ② 自己破壊的 (self-defeating) であり採用不可能
- ③ 欧米諸国で既に成功している政策
- ④ 本文の主たる提言である

(類題 4) 本文の最終文 "that, for institutions long accustomed to deference, may be the most difficult work of all" が示唆するものとして最も適切なものを選びなさい。

- ① 信頼回復は専門機関にとって困難だが必要な作業である
- ② 専門機関は今後消滅する運命にある
- ③ 市民が専門機関を尊敬する義務がある
- ④ 信頼回復は実は容易な作業である

(類題 5) 本文の論理構成として最も近いものを選びなさい。

- ① 現象記述 → 通説の反証 → 真因の提示 → 控えめな処方箋
- ② 結論先出し → 根拠列挙のみ
- ③ 賛成意見の単純な列挙
- ④ 歴史的説明のみで結論なし

## 第10章 (まとめ・宿題・5 分)

今日の核心整理と早稲田政経学部本番に向けた宿題

### 【本日の核心 5 か条】

- ① 政経エッセイは (A) 「現象 → 通説批判 → 真因 → 処方箋」 の 4 段論法が 8 割。第 1-2 段で予測しながら読む。
- ② (B) tacit / It would be tempting / Successive failures / If there is a way through の discourse marker で各段の役割を捕捉。
- ③ "no less informed" のような (C) 二重否定 は「同等以上」のロジック表現。政経頻出。
- ④ 修辞設問 "Why does the author mention X?" は「(D) 直前の主張の例証」として読む (本問 Q4 の 3 つの failures)。
- ⑤ 主旨設問は (A) 中道 + 控えめな処方箋 を選ぶ。「only / wholesale / aggressively」のような断言調は政経エッセイでは罠。

### 【宿題】

- ① 本講義の Q1-Q6 を (A) 見ないで 本文だけ読み直し、自分で 6 問の設問を作成 → 自分で解いてみる (作問の迫体験で読解力が倍増)。
- ② 類題 5 問を解き直し、特に類題 5 (構成設問) について本文 6 段の各段に自分なりのひと言タイトルを書き出す。
- ③ 過去問: 早稲田大学 政治経済学部 英語 (過去 5 年分) から長文読解 1 題を選び、本日の手法 ((B) 4 段論法予測 + データ表現の読み + paraphrase mapping) で精読する。

【次回授業】 政経学部の自由英作文 (250 words 程度) — "Should AI policy decisions be left to experts or subject to democratic vote?" の論理構成

予習: 上記設問に対して 5 分間の brainstorm を行い、賛成 3 点・反対 3 点を箇条書きで挙げてみる。

### 【最後にひとこと】

政治経済学部の英語は (A) 語学試験 であると同時に (B) 社会科学リテラシー試験。本文の expertise 論を「ただの英文」として読むのではなく、「自分が大学で 4 年間学ぶ集合的意思決定の予告編」として読んでください。

早稲田政経の英語で 7 割を取れば、合否ラインを大きく上回れる。本問が解ける今日のあなたなら、(C) 十分に届く。
