第2問 (Short Reading, 15min) [配点 30 点]

次の英文を読み、後の問いに答えなさい。

Coffee is one of the most consumed beverages in the world, with over two billion cups drunk every day. (A) But its history is far more complicated than most people realize. Legend has it that coffee was first discovered in the 9th century in Ethiopia, when a goat herder noticed his animals becoming unusually energetic after eating berries from a certain plant. Whether or not this story is true, what we do know is that by the 15th century, coffee had spread from East Africa to the Arabian Peninsula, where it became the center of social life.

The first coffeehouses opened in Mecca and Cairo, where men gathered to discuss politics, religion, and business. These meeting places quickly became so important — and so politically influential — that some rulers tried to ban them. None of the bans lasted long. By the 17th century, coffee had reached Europe, where it was sometimes called "the Devil's drink" by religious authorities. Pope Clement VIII, however, after tasting it himself, declared coffee acceptable for Christians. The drink's path to global popularity was secured.

Today, coffee is not just a drink but a global industry that shapes economies and lives. (B) From the farmers in Ethiopia and Colombia who grow the beans to the baristas in Tokyo and New York who serve them, millions of people depend on coffee for their livelihoods.

第3問 (Long Reading, 30min) [配点 40 点]

次の英文を読み、後の問いに答えなさい。

For most of human history, people slept in two separate phases. According to historical records from medieval Europe, peasants and city dwellers alike would go to bed shortly after sunset, sleep for about four hours, then wake up around midnight. (A) During this middle-of-the-night interval, often called "the watching," people would read, write, pray, visit neighbors, or simply lie awake thinking. After an hour or two of this calm activity, they would return to bed for a "second sleep" until dawn.

This pattern was not unusual — it was simply how human beings slept for thousands of years. Diaries, letters, and even religious manuals from the medieval period contain abundant references to "first sleep" and "second sleep" as ordinary facts of daily life. The concept of a continuous, uninterrupted eight-hour sleep did not exist.

(B) What changed? According to historian Roger Ekirch, the transformation began in the 17th century with the spread of artificial lighting. As cities installed gas lamps and homes acquired stronger lamps and candles, people began staying up later. The hours after sunset, once spent in quiet preparation for sleep, became hours of socializing, working, and entertainment. (C) The "watching" period that once divided the night gradually disappeared, replaced by a single, longer block of sleep at the end of an extended waking day.

For most of the 20th century, this single-sleep model became so dominant that people who experienced middle-of-the-night wakefulness began to consider themselves "insomniacs." Doctors prescribed sleeping pills. Self-help books offered strategies for "sleeping through the night." Yet, in many cases, what these people were experiencing may not have been a disorder at all but rather an echo of an ancient pattern that the modern world had buried.

(D) Today, sleep researchers are beginning to suggest that some forms of "broken sleep" may not be problems but variations within the normal range of human sleep. If you wake up at 2 a.m. and cannot fall back asleep for an hour, you may simply be returning to a pattern that your ancestors knew well. Rather than fighting it with anxious thoughts or medication, some researchers recommend treating the wakeful interval as your own private "watching" — a quiet, restorative window in which to read, pray, or think.

(E) Our modern obsession with continuous eight-hour sleep may, in the end, be the historical anomaly — not the rule. Recognizing this could change how we understand rest, productivity, and even our

relationship with the night.

artificial lighting — 人工照明

insomniac — 不眠症患者

anomaly — 異常、例外

第3問 (Long Reading, 30min) — Questions

Q14 **14**

What is described in the underlined sentence (A)?

- ① A time when medieval people typically slept the most deeply.
- ② A wakeful period in the middle of the night used for quiet activities.
- ③ A modern habit of late-night socializing.
- ④ A medical condition affecting elderly people.

Q15 **15**

According to the passage, what caused the change in sleep patterns (referring to underlined part B)?

- ① Changes in religious teaching during the medieval period.
- ② The Industrial Revolution and the demand for longer working hours.
- ③ The spread of artificial lighting in the 17th century.
- ④ The invention of modern medicine and sleeping pills.

Q16 **16**

What does the underlined sentence (C) describe?

- ① The complete elimination of sleep in modern life.
- ② The shift from two-phase sleep to a single, continuous sleep at the end of a longer day.
- ③ A new form of medical disorder unique to the 17th century.
- ④ A religious practice that gradually faded from European life.

Q17 **17**

Why does the passage suggest that some so-called "insomniacs" may not have a disorder?

- ① They may simply be wealthier than other people.
- ② They may be experiencing an ancient pattern of two-phase sleep.
- ③ They are imagining their wakefulness during dreams.
- ④ They are following modern medical advice incorrectly.

Q18 **18**

What does the underlined sentence (D) suggest about modern sleep research?

- ① It firmly rejects the idea of broken sleep as natural.
- ② It is beginning to view some interrupted sleep as a normal variation, not a disorder.
- ③ It is focused entirely on prescribing more effective sleeping pills.
- ④ It has dismissed all historical evidence as unreliable.

Q19 **19**

Which best paraphrases the underlined sentence (E)?

- ① Continuous eight-hour sleep is a deeply natural human pattern.
- ② The modern emphasis on eight hours of uninterrupted sleep may itself be the historical exception.
- ③ Modern people sleep far less than their ancestors did.
- ④ Eight-hour sleep is the universal rule across all cultures.

Q20 **20**

What is the main idea of the passage?

- ① Eight-hour continuous sleep is healthier than any other pattern.
- ② Modern artificial lighting should be eliminated for better sleep.
- ③ The history of human sleep is more varied than we assume, and "broken sleep" may be natural.
- ④ Religious manuals from the medieval period should guide modern sleep habits.
